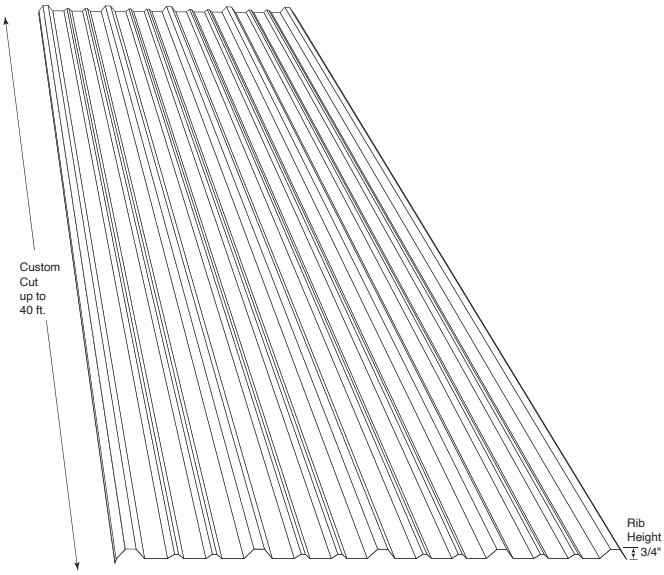
- DuraFlex custom silicone polyester ceramic paint finish
- Anti-siphon water-channel systemfor a virtually leak-free roof
- Custom-cut full-length sheets
- Low cost per sq. ft.



GENERAL INFORMATION

The Straight Rib Panel is 30% wider than traditional rib panels, no other panel comes close. A distinctive continuous look that is virtually seamless. Designed to meet the harshest weather and load conditions while providing long-termbuilding performance. The Muskoka panel is a natural choice for large agricultural and light industrial applications. This panel has a 3/4" high ribat 10 7/8" centres running vertically. For new construction the panel can be installed directly onto 1/2" plywood or over 1"x 4" horizontal strapping.
