

Sinks & Sanitation Station Overview

Introduction

When away from the hot and cold running water comforts we generally take for granted at home or at work, alternative hand-washing options are readily available. These range from chemical-based, hand sanitising liquid washstations through to cold water and/or warm water sinks. Depending on your particular requirement or application...

at Plastic Solutions, we have you covered.

DUO Twin User Sink

Cold water
Not mains connected

A free-standing unit with two sinks positioned diagonally opposite each other. Twin 180L tanks inside sink body, one for fresh and one for grey water. Foot-operated pumps and integral soap dispensers for optimal hygiene. Typically filled and emptied by a third party company.

Hera Twin User Sink

Cold water
Not mains connected

A free-standing unit with two sinks positioned 1m apart. 100 litres of fresh water and 110 litres of grey water capacity. Foot-operated pumps and optional soap dispensers for optimal hygiene. Typically filled and emptied by a third party company. Waste tank has a separate drain point.

HSE Single User Sink

Cold / warm water
Not mains connected

Single sink with a wide and deep bowl to comply with HSE requirements for hand washing on construction sites. 45L water capacity within the sink body. When positioned inside a portable toilet, grey water drains via a hose to a portable toilet tank or separate container. Warm water upgrade available.

Ekko Single User Sink

Cold / warm water
Not mains connected

Compact, single sink with a 42L water capacity within sink body. Generally positioned inside a portable toilet but free-standing applications are also possible: grey water drains via a hose to a portable toilet tank or separate container. Warm water upgrade available.

ACCESSORIES

Paper Towel Dispenser

Compact dispenser for c-fold paper towels.

Hand Sanitiser Dispenser

Dispenses "anti-bac" hand sanitising liquids and gels.

Liquid Hand Sanitiser

70% alcohol content.

Water Steriliser

Used to keep sinks and hoses sterile.

Sinks & Sanitation Station Overview

Speciality Sinks

Even though many of the following sinks and hand-washing options existed before the global Covid-19 pandemic, alternative hand-washing facilities have been developed ranging from hand sanitising stations to hot water solutions.

PED Washstation

Single User - Cold or hot water
Mains water & electricity connected

Designed for indoor or outdoor use, this unit is connected to mains water and comes in four variants: hot or cold water, and with or without an inbuilt pump to drain grey water away. The perfect solution for a multitude of sites and applications.

Hand Sanitising Station

Anti-bacterial
Hand Sanitising Unit

Just two of the key advantages of this high capacity unit: (1) a 7½ litre reservoir for hand sanitising fluid means you won't run out, especially in high "traffic" areas and (2) the foot-operated pump means users will benefit from a "no touch" experience, so cross-contamination is minimised.

Sani-Tree Sanitising Stand

Anti-bacterial
Hand Sanitising Unit

A truly mobile hand sanitiser stand with a weighted base, for stability. Wheels allow you to position the unit exactly where required. With the option to fit your own preferred hand sanitiser dispenser, or use our 400ml units, this stand goes anywhere where extra hand sanitising is required.

400ml Dispensers

Anti-bacterial
Liquid Sanitiser Dispenser

With its refillable 400ml internal reservoir and a nozzle that will dispense liquids, gels or soaps, this dispenser is at home inside the home, at the office, inside portable toilets or indeed in any location where extra hand sanitising is required.

UK Government Advice on SARS-CoV-2 (Covid-19)

"Washing your hands with soap and water, or using hand sanitiser, regularly throughout the day will reduce the risk of catching or passing it on".
