

Transforming Healthcare, One Ride at a Time

Access to care is critical. Without reliable transportation medical appointments are missed or delayed, ultimately harming member/patient health outcomes and profitability for health plans and care providers. Insufficient transportation also leads to additional costly problems like increased ED admissions for preventable scenarios.

SafeRide Health creates a new level of efficiency for delivering member non-emergency medical transportation by eliminating manual processes and integrating disparate silos of information to unlock access to booking rides on-demand, in a HIPAA-compliant and secure platform, with detailed on-demand reporting to know how your benefit is performing in real-time.

Eliminate missed or delayed appointments

On-demand rides for last minute appointments

Algorithm finds the right mode and route instantly

Transform the member experience with SafeRide's revolutionary approach to transportation:

Reduce costs and eliminate fraud, waste, and abuse

National partnership with Lyft® to provide safe and economical on-demand rides.

Ride-match algorithm ensures the right vehicle to meet member's needs.

Improve operational efficiency

Intuitive software platform allows for booking patient rides in 30 seconds.

Route optimization algorithm prevents fraud, waste, and abuse.

Transform the member experience

Appointment reminders sent via SMS, live & automated phone calls.

Post-ride ratings and feedback ensure a high-quality ride experience.

Gain program insight with real-time data

Live tracking of every ride with post-ride reporting to confirm a quality ride every time.

Data exporting and EHR database integrations.
