

# Visium™

## Next-Gen Pricing Transparency & Contracting Solution

### Shaping the landscape of healthcare

The key to controlling healthcare costs is defining the terms of what is reasonable to pay for care. Health plans are far too often asked to pay for care without understanding how or why the fee was charged. This leads to operational inefficiencies and higher costs as health plans and providers continue to disagree on a rational cost for care.

Our transformational solution, Visium™, empowers health plans and redefines healthcare reimbursement. Visium's multi-faceted platform loads and manages contracts for Medicare, Medicaid, commercial, and other government programs. It applies real-time edits and regulatory updates specific to each plan's goal and process output for pricing/repricing that is both accurate and compliant, minimizing claim pass-through frustration. The platform's claim processing functionality is augmented by intelligent gap-fill capabilities that can generate rates for challenging, non-covered claim types like pediatric vaccines, DME, or a trip to an urgent care center.

***"Integrating Payer Compass into our workflows was low effort. They have a standard approach/toolbox that was very straight forward to implement."***

*VP, Business Integration & Implementations | Client since January 2017*

Visium™ can be configured to any plan's goals while making it simple to automate reimbursement terms as you scale to accommodate multiple providers, contracts, groups, rate customizations, and claim volume. A process trail shows exactly how each claim is priced, while sophisticated data auditing tools support your payment integrity initiatives now and in the future. Plus, advanced analytics give you the actionable insights you need to make smarter decisions about provider contract negotiations and direct contracting with facilities.

### Visium™ Features

- ✓ Fully integrated SaaS platform with robust auditing and reporting tools to deliver defensible pricing
- ✓ Modernized claims management
- ✓ Customized edits and reimbursement logic
- ✓ Complements any clearinghouse workflow
