

Radical Cost and Quality Improvement in Oncology and Cardiovascular Care

The steep and unpredictable rise in oncology and cardiology costs is unsustainable for payers. Traditional utilization management captures only 20% of available savings and perpetuates physician and member abrasion.

BUILT FOR THE NEW ERA OF SPECIALTY CARE

Built on 19 years of experience, our approach reduces oncology and cardiology costs while improving physician satisfaction and patient outcomes. We harness high-value clinical pathways, provider-designed technology solutions and innovative payment models to align payers and providers around the pursuit of value.

Engaging Specialists to Make Higher Value Decisions

Our model fosters a uniquely positive physician experience proven to reduce variations in care through:

- Scientific advisory boards comprised of academic and community-based specialists who ensure the rigor of our pathways
- Point of care decision support and rapid prior authorization
- Specialist matched peer-to-peer physician discussions

Optimizing Oncology and Cardiology Programs

We deliver the highest standards of service and quality across high-value specialty programs, supporting:

- Network optimization
- Implementation of value-based payment models
- Establishment of best practice formulary and drug policies

OUR CLINICAL MODEL AND SCOPE

We drive clinical impact across Medicaid, Medicare and Commercial lines of business.
