Disclaimer:

Products in this specification manual must by regulation be installed by licensed and registered trade people. Under our commitment to product development and improvement, we may change product specifications and dimensions or delete models from the range without prior notification. Dimensions and set-outs listed are correct at time of publication and could contain dimensions which are approximate due to tolerances in manufacturing processes. It is important that you thoroughly review the product and check specifications and dimensions prior to surface preparation, cut-out and installation.

During the installation of the product by a qualified trained personnel, make sure that the entire fastening surface is even and smooth (no protruding seams or tile offset), that the finish of the wall is suitable to apply the product and has no weak points. It is recommended that all accessories are secured to timber studs.

| | For best performance and longer life we recommend 150-500kPa. |
| | Hot and cold water inlet pressure should be equal. |
| Temperature Rating | 80°C maximum continuous working temperature |
| Suitable Hot Water Units | Storage Tank - Yes |
| | Continuous Flow - Yes |
| | Gravity Feed - Not Suitable |

For the Plumber

Check 1. All work should be carried out by a licensed plumber. Responsibility will not be accepted by Tribata for incorrect installation of this tapware, or any tapware not installed by a Registered Plumber.

Check 2. The water supply lines need to be 'flushed out' prior to installation. This will avoid any foreign materials blocking the flow regulator, damaging the cartridge/valve and reducing the flow of water.

Check 3. Ensure all connections are tight.

Check 4. Turn on the main water supply and check for leaks.

Plumbers, please ensure a copy of the installation instructions is left with the end user for future reference

Installation Instructions

IMPORTANT INFORMATION, please read before starting installation.

CHECK 1

For packaging purposes, this tapware may come partially assembled.

CHECK 2

Before installation, please ensure that you have checked the assembly of all components and joints.

CHECK 3

Always use plumbers tape or a recommended sealing compound on all threaded joints.

CHECK 4

Please pressure test the tapware prior to installation using recommended testing equipment.

CHECK 5

The installer is responsible for selecting the correct fittings and that the distances are correct before installation.

INSTALLATION Guideline

1. Breech assembly, 150mm centres. (200 mm centres for the models with hand-held shower)
2. Wall brackets allow for pipework to be approx. 40mm clear of wall.
3. Exposed T connections attached to wall outlets. Cover plates behind exposed T connections.
4. Bib tap assembly.
