## **Advanced Sciton Joule Laser Skin Treatments Now Available At SRMC Plastic Surgery**

(SALEM, OHIO) – September 20, 2021 – Those looking to revitalize and improve the appearance of their skin can now benefit from faster and more effective laser skin treatments than ever before.

Board-Certified Plastic and Reconstructive Surgeon Linda Camp, M.D., FACS, is offering innovative Sciton Joule laser therapy locally at SRMC Plastic Surgery to help patients rejuvenate their skin and minimize surface imperfections on the face and body, including hair removal.

**Sciton Joule laser therapy is now being offered at SRMC Plastic Surgery to help patients rejuvenate their skin and minimize surface imperfections on the face and body, including hair removal.**

SRMC Plastic Surgery is an affiliated practice of Salem Regional Medical Center.

Sciton Joule laser therapy is highly customizable and can be used to create an individualized treatment plan for a wide range of skin and cosmetic concerns, from sun damage and age spots to spider veins, unwanted hair and acne scars.

“Unlike most traditional lasers, the Joule uses a system that delivers specific wavelengths to targeted areas of the face and body, without affecting the surrounding tissue,” Dr. Camp explained. “This results in fewer side effects with less risk and faster recovery times than most other lasers currently in use. Many patients can put their makeup on after treatment and go about their day.”

The types of laser treatments available at SRMC Plastic Surgery include:

- **Skin Treatments:** Laser therapy is excellent for facial skin treatment and rejuvenation and can improve the skin's overall texture. These procedures are recommended for wrinkles, pigmentation and scars; and can also be used to treat active acne, target signs of aging and sun damage, as well as firm the skin. The skin tightening treatment can be applied anywhere on the body.
- **Body Treatments:** The Sciton Joule laser's body contouring modules are designed to smooth cellulite and perform targeted skin treatments.
- **Vascular Treatments:** The laser's vascular module can improve the appearance of broken blood vessels and spider veins in the legs and face. Unlike sclerotherapy, this treatment does not require post-procedure compression stockings. The device can also address redness associated with rosacea.
- **Hair Treatments:** Hair removal can also be achieved with the Sciton Joule.

To learn more about Sciton Joule laser therapy or to schedule a cosmetic consultation with Dr. Camp, call SRMC Plastic Surgery at 330-332-7383 or visit [www.srmcplasticsurgery.com](http://www.srmcplasticsurgery.com). SRMC Plastic Surgery is located at 2094 East State Street, Suite G, in Salem.
