

We have decided to preserve as many of our residents as possible and remove them from potential exposure on non-essential elective rotations. The goal is to have as many residents at home to remain healthy should coverage be needed for those exposed in the hospital. ***The residents on the following rotations should remain at home effective 3/23/2020 until further notified and be ready to be called in to cover if needed (available and ready to work).*** Cross coverage and day pagers remain active per the Master Schedule unless otherwise notified. Be sure to continue to cover your boxes and help those who are on ICU/CCU/Nights with theirs. Those on IMC shifts, we will be making changes accordingly so be on the lookout for another email to follow.

Cardiology	Nephrology	Geriatrics
Hem/Onc	GI	Endocrine
Consults	Pulmonology	Hospice/Palliative Medicine
		Rheumatology

Those on **Neurology** will follow the schedule outlined specifically for them.

ID will continue their rotation for now to assist with non-COVID evaluations however will have Friday, Saturday, and Sunday to stay at home (unless cross covering).

Med Teams will be assessed each day to determine resident needs and who can remain/go home, Seniors please check in with me either at the start of each day or end of each day to determine who needs to come in the next day.

NF/ICU/CCU will continue to be fully staffed – additional residents may be pulled from home to help cover ICU services if census numbers rise and additional support is needed.

Michael Nguyen, M.D.

Chief Resident, Assistant Program Director

Department of Medicine

Internal Medicine Residency
