Beth likes to sew. She got a really cool piece of material that measured 24 inches long and 10 inches wide. "That is a little long to cover our box," said Pam.

"Yeah. Let me cut this in half," Beth replied.

Oops. Beth did not cut the material in half. One piece was now 6 inches longer than the other piece. "At least they are still both 10 inches wide," laughed Beth.

How long is each of the two pieces?

This puzzle has a large number in the middle, which is the sum of the four numbers that surround it.

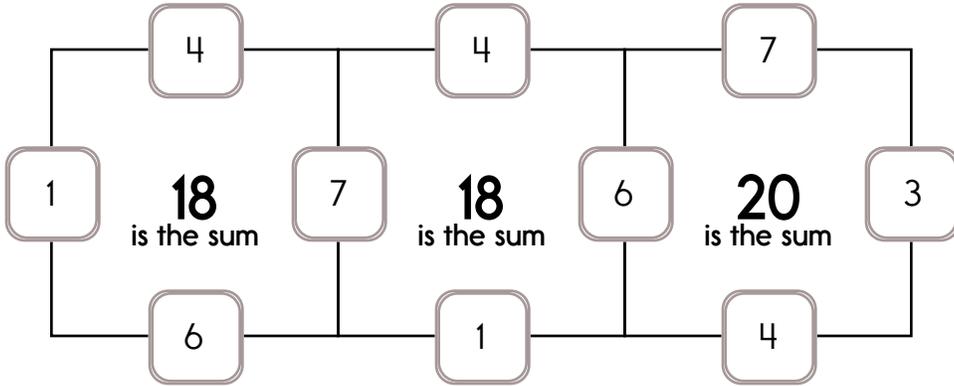

Example:

$$1 + 7 + 4 + 6 = 18$$

Example:

$$6 + 3 + 7 + 4 = 20$$

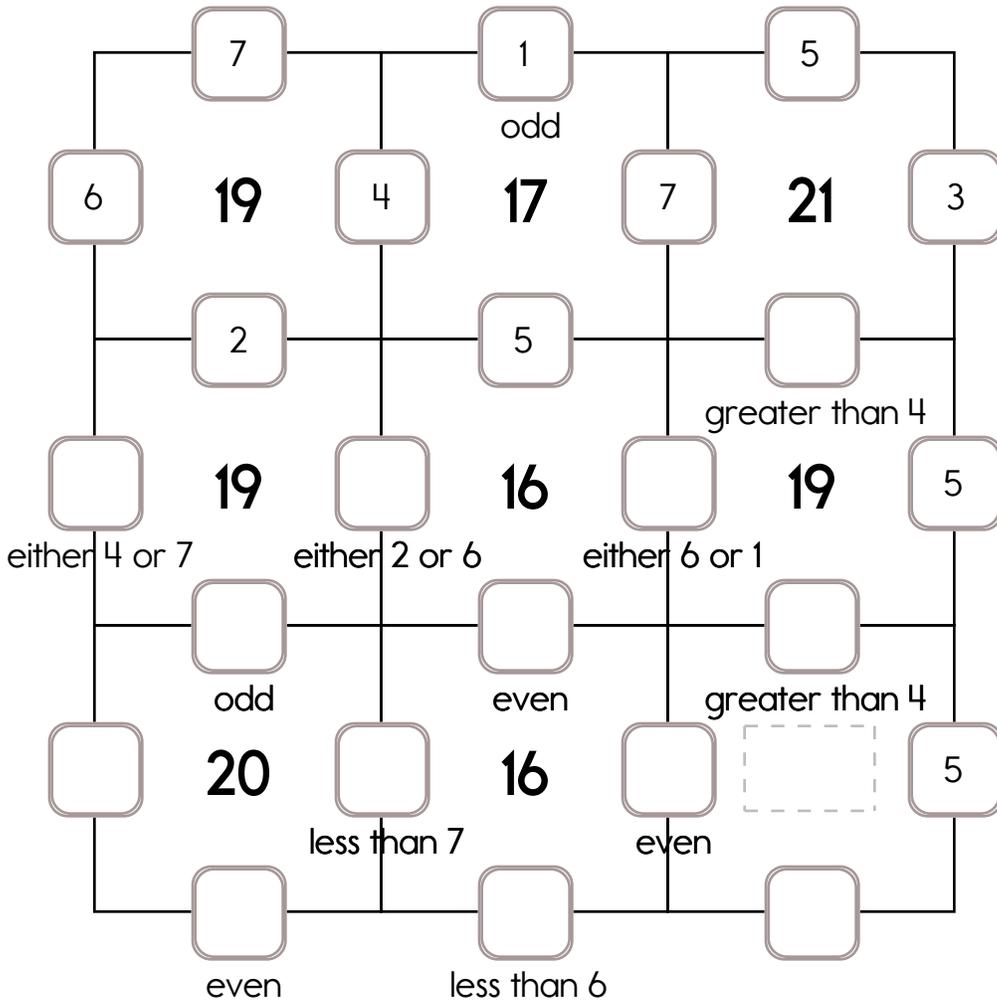

Sample:

Fill in the missing numbers. How? The sum of the four surrounding numbers is in the center of each square.

Exactly one of the four numbers has to be one of these numbers: 1, 2, or 3.

The other three numbers have to all be DIFFERENT and must be from these: 4, 5, 6, or 7.
