

Freshbooks DevOps Migration

Consulting and product expertise to implement and configure Jenkins and migrate the CI pipeline from AWS to GCP

The challenge

Poor performance and throughput for transactions due to backlogged messages, coupled with a complex DevOps architecture and high network traffic

The solution

Implemented Jenkins and migrated the current CI pipelines onto GCP Migrated workloads from other sources to GCP destination

The results

A scalable DevOps framework with a consolidated architecture on GCP that runs the client's CI/CD pipelines. Reduced costs Better performance

“Opticca assisted us in migrating CI/CD pipelines onto GCP that allowed for Freshbooks to scale our DevOps framework, mitigate costs, and add speed, agility, and flexibility to our delivery lifecycle.”

Dan Tudorovski, IT Director, Freshbooks

About the customer
