Wiring Harness Installation Instructions

Ignition Sense Installation

(90 min shutoff timer once truck is turned off)

Step 1: Guide the end of the wiring harness with 3 wires to the fuse panel. The ground (Black) wire should be fastened to the metal body with a self-tapping screw or connect to an existing screw/bolt that is grounded. It is best to install the ground where daily activity in the vehicle won't hit it.

Step 2: Locate 12 Volt ignition fuse in the panel and connect the White wire using the copper fuse tap provided.

Step 3: Locate a constant hot 12-volt fuse, and using a fuse tap, connect the Red wire to complete installation.

Wire Hot Installation

(Constant power to GPS unit, even after truck is turned off)

Step 1: Complete ignition sense installation Step 1. (Found Above)

Step 2: Twist White and Red wire tips together, ensuring they will not separate from one another during installation. Locate a hot 12-volt fuse and using a fuse tap connect the twisted Red and White wires.

About and Warranty

- Providing commercial vehicle mounts for feature phones, smartphones and tablets since 2005.
- Installed in garbage trucks, taxis, cement, trucks, busses, dump trucks, and long-haul trucks.
- Deployed in 130,000 commercial holders.
- Two-year warranty on protective case
- One-year warranty on wiring harness

Wiring Harness

- Certified by the National Accessory Center (NAC)
- 2.4 amps of power
- Prevents over-charging
- Complete & ready to install
- 200,000 currently installed
- Ready-to-Install
- One-year warranty

Cradle

1. Magnetic, pogo pin charging connector
2. Keyed cradle lock provides security and stability when tablet is mounted in vehicle.
Commercial grade, 4-inch mounting post with metal mounting bracket and rubber ball that absorbs vibration
3. Heavy-duty, spring loaded cradle

High-Impact Protective Case

- Durable, ruggedized polymer
- Designed for Samsung Tab E or Apple Mini 4 (Must purchase specifically for model)
- Hand Strap
- Sealed control buttons
- Secure, 4-point cradle hooks
- Quick-Release
- Easy installation
- Two-year warranty

Quick – Connect Charging System

The dock side of the connector is built-in to the mounting bracket and supplies power from the vehicle via the wiring harness.

The tablet is built to be durable, has a protective case, and plugs into the charging port of your device. Because you never have to unplug the connector from your device, your tablet's USB charging port will be protected from physical damage.
