Herringbone Console Table

Console table with a surface of either tiles in herringbone pattern or composite stone - both with powder coated metal frame with a lightly structured surface. Designed in 2017 by Charlotte Høncke. The tile design is inspired by the traditional tile-topped table, which go back hundreds of years; indeed, the Herringbone Tile tables embraces historical references and classic craftsmanship in a contemporary design. The composite stone surface is upcycled offcut material from other production, which, therefore, offers a environmentally friendly choice. The Herringbone console table is elegant as decorative storage in the hallway or bedroom in combination with a mirror. Choose between frames and tiles in several colours.

Product name: Herringbone Console Table
Designer: Charlotte Høncke
Design year: 2017
Furniture type: ConsoleTable
Launched: 2018

KEY FACTS

- Focus on quality and craftsmanship
- The tiles and composite are laid by hand in Denmark
