The software solution enables courier and delivery businesses in industries such as moving and heavy-item transportation, deliveries for local retail and subscription businesses as well as last-mile and shopping butler startups to accelerate their business.

CEO & Founder Patrick Arle explains: „*The prevailing coronavirus pandemic has exposed the significance of intuitive and dependable delivery services all over the world. To answer the growing demand of end-to-end software, our engineering team has implemented powerful and versatile features which help delivery operators and marketplaces to streamline their business processes.*"

Encompassing white-label apps for drivers and customers as well as powerful dispatching and management dashboards M-TRIBES Delivery Software Premium (2499€/month) allows delivery businesses to integrate a state-of-the-art brand experience from ordering to fulfillment while advanced features such as multi-stop route planning and automatic invoice creation help increase operational efficiency.

For the first time, M-TRIBES is releasing a second Software-As-A-Service plan which allows delivery businesses to operate a ready-to-scale business with software expenses of 999€ per month.

Overview of the new software plans available at:

CMO, Johannes Schubert highlights: *„A three digit price tag next to the extensive list of features of our Pro plan is a breakthrough moment in our corporate strategy to enable local businesses all over the world to enter the new normal of the digital-first delivery economy."*

In order to fulfill this promise, M-TRIBES has allocated engineering capacity into the seamless onboarding of software-as-a-service tenants. CTO Chris Olszowka explains. *„With our delivery software launching or relaunching IT including apps and dashboards is no longer a mammoth task. Our team of backend, frontend and mobile engineers has enabled our customers to have their software stack ready for launch very rapidly."*
