Online trading has inherent risk due to system response, execution price, speed, liquidity, market data and access times that may vary due to market conditions, system performance, market volatility, size and type of order and other factors. An investor should understand these and additional risks before trading.

Content, news, research, tools, market data and securities symbols are for educational and illustrative purposes only and do not imply a recommendation or solicitation to buy or sell a particular security or to engage in any particular investment strategy. The information provided is not warranted as to completeness or accuracy and is subject to change without notice. The information provided should not be considered legal or tax advice. Consult an attorney or tax professional regarding your specific situation. The projections or other information regarding the likelihood of various investment outcomes are hypothetical in nature, are not guaranteed for accuracy or completeness, do not reflect actual investment results and are not guarantees of future results. All investments involve risk, losses may exceed the principal invested, and the past performance of a security, industry, sector, market, or financial product does not guarantee future results or returns. Consider the investment objectives, risks, charges, and expenses of a fund before investing. Contact us for a prospectus containing this information. Please remember that diversification is not an investment strategy without risk, and in certain circumstances, it may not fit your investment objectives.

Investors should consider the investment objectives, risks, and charges and expenses of an Exchange Traded Fund ("ETF") carefully before investing. Before investing in any ETF, you should consider its investment objective, risks, charges and expenses. Contact us at support@passfolioapp.com for a prospectus containing this information. Read it carefully. ETFs are subject to market fluctuation and the risks of their underlying investments. ETFs are subject to management fees and other expenses. ETF shares are bought and sold at market price, which may be higher or lower than their NAV, and are not individually redeemed from the fund. Investment returns will fluctuate and are subject to market volatility, so that an investor's shares, when redeemed or sold, may be worth more or less than their original cost. ETFs are subject to risks similar to those of stocks. Some specialized exchange-traded funds can be subject to additional market risks. Leveraged and inverse exchange-traded products are not designed for buy and hold investors or investors who do not intend to manage their investment on a daily basis. These products are for sophisticated investors who understand their risks (including the effect of daily compounding of leveraged investment results), and who intend to actively monitor and manage their investments on a daily basis.

To purchase securities using cryptocurrencies, your cryptocurrency will first be converted into U.S. Dollars by Panchain Financial LLC. U.S. Dollar proceeds will then be moved to your brokerage account at Panchain Securities LLC, where they will be used to buy securities.

Currency and cryptocurrency exchange services provided by Panchain Financial LLC, a US Money Services Business registered with FinCEN.

Securities products and services offered to self-directed investors through Panchain Securities LLC Member FINRA / SIPC. Panchain Securities LLC, Panchain Financial LLC and Panchain, Inc. are separate but affiliated companies.

Securities products are: Not FDIC insured · Not bank guaranteed · May lose value

Market data refreshed at least every 15 minutes unless otherwise indicated. Market data provided by [Alpha Vantage](#) and [World Trading Data](#).
