

# Merton at Home

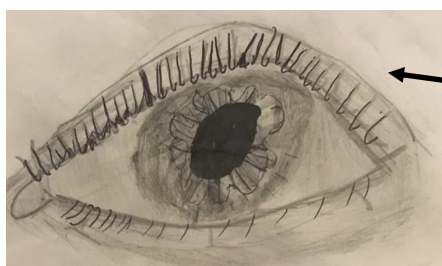

Edition 5 July 2020

This week was Sports week. Lockdown has meant that for all of us the sport that we love to play and watch has been stopped including Wimbledon, the Olympics and football. This week the projects were designed around getting active and having our own Home Olympics. There were lots of activities to complete to make sure that the Olympics went smoothly including the opening ceremony, the famous Olympic torch and designing your very own team kit. I hope that you enjoyed the project and I know we have loved looking at some of the pictures that have been shared with us all. Here are some of what has been sent through...

Masie has spent her time producing a fantastic Olympic logo. I love the funky design Maisie. And I know that you had been researching about the pole vault. It always strikes me as an odd sport to take up but I hope that you learnt a lot :-)

Ed, Alice and Mum all got involved in their home Olympics and created their events. I love how much you all work together and get Mum involved too. Thank you :-)

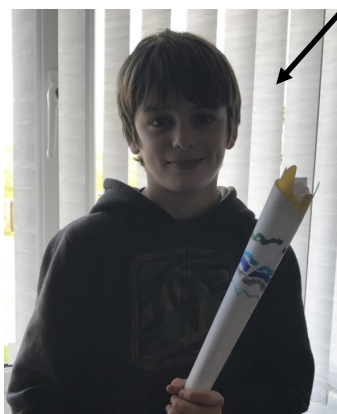

Alicia has given herself a challenge to learn about the Human body this week and spend time focusing on the eye. Using Oak Academy, she was able to really concentrate on learning how to draw the eye. This is very impressive Alicia—I love how you are choosing your own learning too :-)

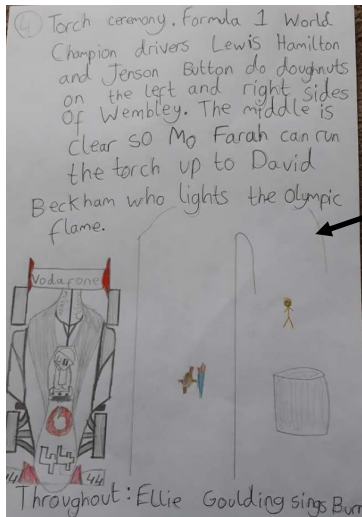

Luke in year 6 has combined several challenges to make this fantastic model. It definitely something that can make anyone smile. Thank you Luke.

Aarini has been working hard at home to develop her Home Olympic whilst Mum is working and has produced a new kit for her team and a brilliant Logo for her Home Olympics. I think some designers might need to have a look at what the children of Merton can do!!!

Ryan in Year 6 has been working through this week Sports pack and decided to make the Olympic torch for his home Olympics. It is full length and he has even remember to include the flame to it. Thank you Ryan, I hope that you have enjoyed this week.

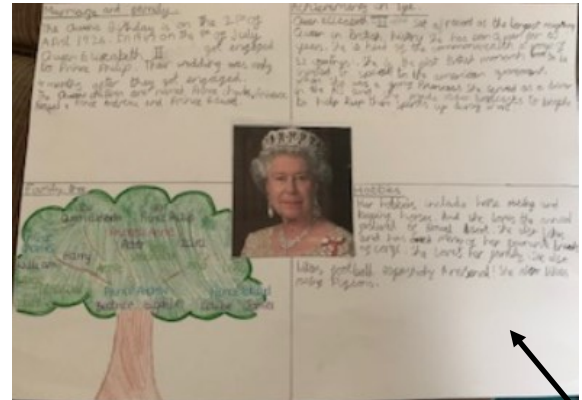

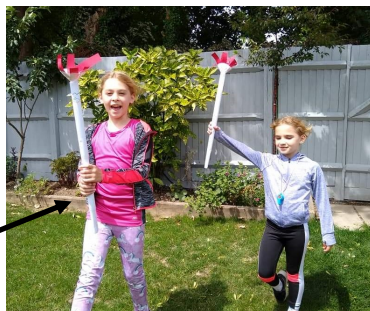

Lewis has been an incredible amount of thought into his opening ceremony with many famous faces joining in with a historical re-enactment and even the appearance of the spitfire. I am hugely impressed Lewis.

Ella-Louise seems to have her hands full... of compost this lockdown period. She has taken up a spot of gardening and is planting seeds. I hope they grow well and I look forward to seeing the finished result :-)

The Brazier girls took on their own Olympics and the pictures showed them having a great time. With Olympic torches, games and mum keeping the peace, the competitive spirit was definitely evident from these girls! What a fantastic job :-)

Katie in year 4 has been working brilliant on her own research. Thank you so much for sharing this Katie. There is so much information on her :-)

## Fabulous Factfile Award...

Nirav has spent this week researching Volleyball. His work was detailed and he had shared the facts he had learnt using our wonderful circular book idea. I love how you have also used the colours of the volleyball to help to decorate the book. Thank you Nirav, I have certainly learnt something new this week.

## Happy Birthday to you...

We would normally celebrate birthdays in assembly each week, but for now, we would like to say a huge Happy birthday to...

**Yahvi Gabriella Renn-Rose Krish**  
**Kayden-James Oliver C**

Birthdays will be shown from 29.6.20 to the 5.7.20
