BROADCAST DISTRIBUTION UNDERTAKING DEFINITIONS

BROADCAST DISTRIBUTION UNDERTAKING	DEFINITION
CABLE	A system that transmits original programming and programming of broadcast TV stations to consumers over glass fibre wired network.
DTH	Direct-To-Home Satellite - High-powered a radio relay station in the sky that receives transmissions from Earth then re-transmits them back to receiving stations on the ground, in this case, directly to homes.
IPTV	Internet Protocol TV - A system through which television services are delivered using the Internet protocol suite over a packet-switched network such as a LAN or the Internet, instead of being delivered through traditional terrestrial, satellite signal, and cable television formats.
LMDS	Local Multi-Point Distribution System - This is known as "Wireless cable". A pay television services that delivers multiple cable programming services to subscribers via omnidirectional microwave broadcasts. To receive the broadcast, subscribers are equipped with a special antennas and tuners.
MATV	Master Antenna TV - This is essentially cable system except MATVs operate on private property - apartment buildings, condos, private housing and mobile park homes. In most cases, it's done by hooking up an earth station that's aimed at a cable satellite to a multi-unit building's master antenna system.
MMDS	Multi-Point Distribution System - This is known as "Wireless cable". A pay television services that delivers multiple cable programming services to subscribers via omnidirectional microwave broadcasts. To receive the broadcast, subscribers are equipped with a special antennas and tuners.
SMATV	Small Master Antenna TV - This is essentially cable system except SMATVs operate on private property - apartment buildings, condos, private housing and mobile park homes. In most cases, it's done by hooking up an earth station that's aimed at a cable satellite to a multi-unit building's master antenna system.
TELCO	Essentially a cable system provided by a telephone operator.
