PET CARE EXPERTS

## dog walking

We strive to leave your pets comfortable, happy, and excited for their next walk. We understand their well-being is reliant upon routine and consistency, which is why we assign your dog its own designated walker. We never group more than three dogs at a time\*, so your pet is guaranteed plenty of attention. At the end of each walk, you will receive an update with highlights and a photo from their recent adventure. In order to use our dog walking services, a minimum of three scheduled walks per week is required.

\* Private walks are provided on a limited basis and are dependent on staff availability. Semi-private walks are small social group walks of up to three dogs at a time, all of similar size and temperament.
