

# blank prints      Installation

hi – thanks for ordering from our online gallery.  
Please follow these instructions to hang your prints professionally.

01                      Drag two holes in your wall and integrate the wall plugs. The distance between the holes should lie within the following measurements:

Horizontal image = min. 40 cm, max. 90cm

Vertical image = min. 20cm, max. 48cm

02                      The scope of the delivery includes two mounting plates. Attach the plates to the previously drilled holes in the wall with the curved side pointing up.

03                      Now hang the image to the wall by placing the metal frame on the backside of the image on the mounting plates.

04                      Now you can take a picture of the hanging print and share it either with your friends or with us.
