West Kameng, Arunachal Pradesh

Sub: Submission of grievances of the project affected people and request for immediate intervention

Ref: Your letter No. Nil Dtd. 10.08.2019

Sir,

With reference to the subject cited above, I am directed to intimate the following:

- In regard to repair and maintenance of the road from Pinjoli to Bichom including its black topping, it is to reiterate that the same will be reviewed after commissioning of Kameng HE Project. Owing to the delay in commissioning of Kameng HE Project, the Corporation is presently facing financial hardships and not in a position to take up the aforesaid works at this stage. However, on successful commissioning of the project as well as approval of Revised Cost Estimate (RCE) by the Competent Authority wherein provision for improvement of the said road has been considered, the issue will be reviewed.
- You will appreciate that since the initial stages of project construction, various works like formation cutting of roads, associate works viz; protection wall, cross drainage works, boulder soling, GSBC works etc including bridges and abutments were awarded to local indigenous people/local capable contractors/land affected people.
- This is to inform that there had been restriction on regular recruitment since 2006 imposed by the Ministry of Power, Govt. of India which had observed that total manpower strength of the Corporation is far in excess of the prescribed norms considering the present and future projects of the Corporation.

However considering the aspiration of the local people residing around the project and on persistent pursuance by the corporation, the Ministry had partially relaxed the restrictions and 88 (eighty eight) nos. of regular posts in C&D category against KaHEP were filled through nomination of eligible candidates received from the local Employment Exchange as per the CNV Act and applications received in response to job advertisement published in local newspapers of Arunachal Pradesh (for JEs). During 2005-2011, 14 (fourteen) engineers and 1 (one) doctor were recruited on deputation basis from the state government of Arunachal Pradesh although all of them except the Doctor had gone back to their parent department. Further, 14 (fourteen) local persons are also engaged on work charge basis in the project.

The above facts were informed in various meetings in presence of the local people and state authority. Further, keeping in view requests made by various local NGOs of Kameng West District, the corporation had requested the Ministry to allow recruitment of certain specific posts in technical cadre. However, consent is still awaited from the Ministry in this regard. Moreover, as per the directive of the Ministry, a high level committee has been recently constituted to study the manpower structure and recommend optimum manpower norms in Hydro sector.

This is for favour of your information.

Thanking you,

Yours sincerely,

(Jaydev Nandy)

Dy. General Manager (HR)
