MOTIF

NANAKSAR GURUDWARA

This Gurudwara is located in about 11 acres land area in the village Bhadaur of Barnala tehsil. This Gurudwara is located about 30 km. from Barnala. The Sangat of village Bhadaur requested Sant Baba Ishar Singh Ji to build a Gurudwara at this place that was completed by Sant Baba Gurdev Singh Ji. Sant Baba Gurdev Singh Ji initiated Katha & Kirtan at this place in 1964 in the temporary structure. However the new building was constructed in 1990. At this place, Masand (last day of lunar calendar month) is celebrated every month and Sangat attend the Bhog of Sri Sampat Akhand Path of Sri Guru Granth Sahib Ji and Katha & Kirtan. Amrit is administered every month after the ceremonies.

FOREWORD

The District Census Handbook (DCHB) is an important publication of the Census Organization since 1951. It contains both Census and non Census data of urban and rural areas for each District. The Census data provide information on demographic and socio-economic characteristics of population at the lowest administrative unit i.e. of each Village and Town and ward of the District. The Primary Census Abstract (PCA) part of this publication contains Census data including data on household amenities collected during 1st.phase of the Census i.e. House Listing and Housing Census. The non Census data presented in the DCHB is in the form of Village Directory and Town Directory contain information on various infrastructure facilities available in the village and town viz; education, medical, drinking water, communication and transport, post and telegraph, electricity, banking, and other miscellaneous facilities. Later on, the Telegraph Services were closed by the Government of India on 15th. July, 2013. The data of DCHB are of considerable importance in the context of planning and development at the grass-root level.

2. In the 1961 Census, DCHB provided a descriptive account of the District, administrative statistics, Census tables and Village and Town Directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, District Census tables and certain analytical tables based on PCA and amenity data in respect of Villages. The 1981 Census DCHB was published in two parts: Part-A contained Village and Town Directory and Part-B the PCA of Village and Town including the SCs and STs PCA up to Tahsil/Town levels. New features along with restructuring of the formats of Village and Town Directory were added. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent Village, the distance in broad ranges from the nearest place having such an amenity, was given.

3. The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of Village Directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation.

4. As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a Village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

5. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. These newly added amenities are: Pre-Primary School, Engineering College, Medical College, Management Institute, Polytechnic, Non-formal Training Centre, Special School for Disabled, Community Health Centre, Veterinary Hospital, Mobile Health Clinic, Medical Practitioner with MBBS Degree, Medical Practitioner with no degree, Traditional Practitioner and faith Healer, Medicine Shop, Community Toilet, Rural Sanitary Mart or Sanitary Hardware Outlet in the Village, Community Bio- gas, Sub Post Office, Village Pin Code, Public Call Office, Mobile Phone Coverage, Internet Cafes/ Common Service Centre, Private Courier Facility, Auto/Modified Autos, Taxis and Vans, Tractors, Cycle-pulled Rickshaws, Carts driven by Animals, Village connected to National Highway, State Highway, Major District Road, and Other District Road, Availability of Water Bounded Macadam Roads in Village, ATM, Self-Help Group, Public Distribution System(PDS) Shop, Mandis/Regular Market, Weekly Haat, Agricultural Marketing Society, Nutritional Centers (ICDS), Anganwadi Centre, ASHA (Accredited Social Health Activist), Sports Field, Public Library, Public Reading Room, Assembly Polling station, Birth & Death Registration Office. In the Town Directory, seven Statements containing the details and the data of each Town have been presented viz.; (i)-Status and Growth History of Towns,(ii)- Physical Aspects and Location of Towns, (iii)-Civic and other Amenities, (iv)-Medical Facilities, (v)-Educational, Recreational & Cultural Facilities, (vi)- Industry & Banking, and (vii)-Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 Census as presented in earlier Census.

6. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

7. The Village and Town level amenities data have been collected, compiled and computerized under the supervision of Ms. Seema Jain, Director of Census Operation , Punjab. The task of Planning, Designing and Co-ordination of this publication was carried out by Dr. Pratibha Kumari, Assistant Registrar General (SS) under the guidance & supervision of Dr. R.C.Sethi, Ex-Addl. RGI and Shri Deepak Rastogi present Addl.RGI. Shri A.P. Singh, Deputy Registrar General, (Map) provided the technical guidance in the preparation of maps. Shri A.K. Arora, Joint Director of Data Processing Division under the overall supervision of Shri M.S.Thapa, Addl. Director (EDP) provided full cooperation in preparation of record structure for digitization and validity checking of Village and Town Directory data and the programme for the generation of Village Directory and Town Directory including various analytical inset tables as well as Primary Census Abstract (PCA). The work of preparation of DCHB, 2011 Census has been monitored in the Social Studies Division. I am thankful to all of them and others who have contributed to bring out this publication in time.

New Delhi.

Registrar General &
Census Commissioner, India

PREFACE

The publication of District Census Handbook (DCHB) has been a regular feature ever since 1951, the first Census after independence. It aims to provide village/town level statistics for use by the government departments, non-government agencies, academicians and scholars, alike.

At the 1961 Census, a beginning was made to include village level data also on availability of amenities such as educational, medical, postal and communicational, land use pattern etc. in the form of Village Directory. Likewise, for towns, information with regard to their physical, financial, socio-cultural aspects and infrastructure were also added at town level. Keeping in view the great utility of non-census data in the form of Village Directory and Town Directory, the same has remained to be an integral part of the DCHBs ever since 1961. Above all, the analytical part and inclusion of maps presenting data at village level has further enriched the scope and use of this publication. The analytical note describes historical, administrative, physio-graphic and demographic aspect of the district.

The present volume has two parts viz., Part A - Village and Town Directory and Part B – volume of the DCHB will now contain Village and Town wise Primary Census Abstract (PCA) alongwith Housing amenities data. Now, this time both Part-A and Part-B of DCHB are being published separately for each district.

This volume of Part-B is giving data for each village within the Community Development (CD) Block and each town in the district. In order to ensure greater authenticity of the data, an effort has been made to cross check the same with the information available from other sources. We do hope that the contents and coverage of this publication would be of great use to the user agencies.

The production of the DCHB has always remained to be a joint venture of the Central Government and the State Government. We greatly acknowledge and express our deep gratitude to the Government of Punjab for extending their complete cooperation in providing the requisite data in the form of Village Directory and Town Directory. The District Gazetteers and the Statistical Abstracts brought out by the State Government were of big help to us in the preparation of brief analytical note.

We owe our deepest gratitude to Dr. C. Chandramouli, IAS, Registrar General and Census Commissioner, India and for their directions and support from time to time in accomplishing this onerous task.

The great effort and hard work done by Shri K.S. Bhatnagar, Joint Director, Shri Bhagirath Singh, Deputy Director, Shri Rajender Prasad, Assistant Director, Shri C.K. Dutta, Assistant Director, and Smt. RenuBhagat, S.I. Grade II are greatly acknowledged.

Last but not the least the publication of DCHB is a collective effort of the staff in the directorate and the services rendered by them (as per list) are acknowledged with thanks.

HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK

The need of data at the grass root level for the administrative and planning purposes at sub micro level as well as academic studies prompted the innovation of District Census Handbook. District Census Handbook is a unique publication from the Census organization which provides most authentic details of census and non-census information from village and town level to district level. The District Census Handbook was firstly introduced during the 1951 Census. It contains both census and non census data of urban as well as rural areas for each district. The census data contain several demographic and socio-economic characteristics of the lowest administrative unit i.e. of each village and town and ward of the district. The non census data comprise of data on availability of various civic amenities and infrastructural facilities etc. at the town and village level which constitute Village Directory and Town Directory part of the DCHB. The data of DCHB are of considerable importance in the context of planning and development at grass-root level.

In 1961 census DCHB provided a descriptive account of the district, administrative statistics, census tables and village and town directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was published in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given.

The pattern of 1981 census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation.

As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a village in addition to prescribed facilities of earlier censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. In the Town Directory, seven Statements containing the details and the data of each town have been presented viz.; (i)-Status and Growth History of towns,(ii)- Physical Aspects and Location of Towns, (iii)-Civic and other Amenities, (iv)-Medical Facilities, (v)-Educational, Recreational & Cultural Facilities, (vi)- Industry & Banking, and (vii)- Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 census as presented in earlier census. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

Brief history of district

The ancient details reveal that this place was initially a village named as Anahat Garh. In a neighboring villages Bhadalwadh, Runagarh, Muslims used to live here and indulged in cattle stealing and plundering acts in the surrounding villages by grazing the cattle's in their crops. Following this regular torture given by Runagarh Muslims, people of Anahadgarh went to Bhadur for help, at that time Baba Gama was not in his house, but his brother Baba Ala Singh was there and after hearing the problems, he came along with the people for help & eventually forced all Muslims of Runagarh to runaway. Afterwards Baba Ala Singh planted a tree there and occupied this place in 1722 and retained it as a capital till 1763. There is also another saying that Anahadgarh was already in existence before, but was deserted following the repeated attack of Dharvis.

There are other various sayings about the existence of Barnala. Some are of the view that Varna being a region of frequent storms and this place was having experience of such thunder storms therefore at that time it was called Varna, which later on became Barnala. Because of precision of this example another version reveals that a fort here is said to be built by Baba Ala Singh in which there was a 'Baahuli' (a Well which had stairs going down) that too due to the precision of example and in Malwai accent it was known as "Baain" and thus Bain Walla ultimately became Barnala. According to still another version, the Barnala was named after Baba Ala Singh who left the Bhadur with his elder brother (home Town of Patiala State) was ultimately settled at Barnala and afterwards, from here he conquered many areas with the help of Bhadaur Sardars. Though initially, it was a district headquarter in erstwhile princely state system which was later merged in PEPSU (Patiala & East Punjab States Union) and was subsequently degraded as Sub. Divisional headquarter. These are however, based on different views only, but no historical details/facts are available as how the name of Barnala came into existence.

Administrative Setup

The present Punjab is only one-seventh of what it was before Independence. The first event which reduced its size was the partition in 1947 when western part of its territory was transferred to Pakistan. It suffered another loss of territory in 1948 when Himachal Pradesh (the then a Class 'C' State and now a full-fledged State) was carved out of it. The year 1956 however, witnessed an addition of territory due to merger of PEPSU into Punjab. Again on November 1, 1966, the State got re-organized on linguistic basis and its area reduced considerably.

Situated in the north-west of India, Punjab spreads between 29° 33' N to 32° 31' N latitude and 73° 53' E to 76° 56' E longitude. It is flanked by Jammu & Kashmir to the north, Himachal Pradesh to the east, and Haryana and Rajasthan to the south. Roughly triangular in shape, Punjab covers an area of 50,362 sq. km. As per Census 2011, it has a population of 27.7 million. Among the States and Union territories, it ranks 20th in area and 15th in population.

At the time of 1971 Census, Punjab State was comprised of 11 districts. With the creation of Faridkot district after 1971 Census, the number of districts in the State increased to 12 in 1981 and the number of districts remained the same in 1991 Census as well. During 1991-2001 five new districts were created. These namely are; Nawanshahr, Fatehgarh Sahib, Moga, Muktsar and Mansa. After 2001 Census, three new districts namely, SAS Nagar (Mohali), Tarn Taran and Barnala were created. SAS Nagar district was created by taking out Kharar and SAS Nagar tehsils of Rupnagar district and Dera Bassi tehsil of Patiala district. Tarn Taran district was created out of Amritsar district and includes Tarn Taran, Patti and Khadur Sahib tehsils. Barnala district was created out of Sangrur district and is comprised of Barnala and Tapa tehsils.

Administratively, the State is divided into four divisions namely, Jalandhar, Patiala, Firozpur and Faridkot. As per Census 2011, there are 20 districts comprised of 77 tehsils, 217 towns and 12,581 villages. Among the towns, 143 have statutory status. The remaining 74 are Census towns, created based on laid down demographic criteria and are non-statutory in status. Out of 12,581 villages, 413 are uninhabited i.e. with zero population. As such, there is a net increase of 3 districts, 5 tehsils and 60 towns (4 statutory and 56 census towns) in Census 2011 over that of 2001.

A complete detail of changes in territorial units during 2001-2011 is given in Appendix to Table A-1 in General Population Tables. Out of 20 districts in Punjab, seven districts which have not experienced any inter - district or intra - district jurisdictional change during this decade are; Kapurthala, SBS Nagar, Ludhiana, Firozpur, Faridkot, Bathinda and Mansa. The remaining 13 districts have undergone jurisdictional change at inter/ intra district level and Barnala is one of them.

Barnala became a district on 19/11/2006 and Sri. Surjit Singh Dhillon was the first to be appointed as Deputy Commissioner of Barnala. District Barnala has two sub-divisions Barnala and Tapa, three sub-tehsil Tapa, Bhadaur, Dhanaula and three blocks Barnala, Sehna and Mahal Kalan. District has 5 Municipal committees. Seat of Parliament is attached with Sangrur.

Earlier Barnala was a part of district Sangrur. The district is surrounded by Ludhiana in North, Sangrur in east, Mansa in its south. Moga and Bathinda fall in the western side of the district.

For the administrative purposes, the district is a part of Faridkot division. The district is the basic unit of administration. For the purposes of general and revenue set up the district is divided into two tahsils viz Barnala and Tapa. All of them have sub divisional status. The district is divided into three development blocks, viz, Barnala, Sehna and Mahal Kalan. As per Census 2011 Barnala district comprises of 128 villages out of which one is uninhabited village. There are 5 statutory towns namely Barnala, Handiaya, Dhanaula, Tapa and Bhadaur. The administrative machinery of the district consists of hierarchy of officers and officials headed by the Deputy Commissioner (also the District Magistrate) as head of the administration of the district as well as revenue administration in the district.

The Statutory towns are notified by the State Government. Section 4 of the Punjab Municipal Act, 1911 lays down the specifications of local areas to be smaller urban areas or transitional areas and constitution of Municipal Council and Nagar Panchayat. Under this section, the State Government may, having regard to population of area, the density of population therein, the revenue generated for local administration, the percentage of employment in non-agricultural activities, the economic importance or such other factors, as it may deem fit, specify by notification in the official gazette any area to be transitional area or a smaller urban area for the purpose of this Act. Further, under Section 4 (ii) where an area is specified as a transactional area or as a smaller urban area under sub section (i), the State Government may, by notification in the official gazette, constituted for the transactional area so specified a Nagar Panchayat and for the smaller urban area so specified a Municipal Council of the Ist Class, IInd Class or IIIrd Class.

The different categories of urban bodies constituted by Punjab government under the provisions of Punjab Municipal Act are as follows:

Sl. No.	Class of Urban Local Bodies	Population	Income (in Rs.)
1	Municipal Corporation	3 lac or above	2 Crore or above
2	Municipal Council Class I	50,000 to 3 lac	50 lac to 2 Crore
3	Municipal Council Class II	10,000 to 50,000	15 lac to 50 lac
4	Municipal Council Class III	Up to 10,000	Up to 15 lac
5	Nagar Panchayat	5,000 or above	More than Rs. 150 per head

The following statement indicates the jurisdictional changes which took place after the 2001 Census in Barnala District.

Jurisdictional Changes during 2001-2011

Name of District/ Tahsil	No. of villages		No. of Towns		Changes since 2001 & Govt. Notification No.
	2001	2011	2001	2011	
1	2	3	4	5	6
Barnala	125	128	5	5	i) A new district Barnala carved out by taking entire Barnala Tehsil of Sangrur district vide notification no. 1/5/2006-RE-II(i)/12611 dated 08.11.2006
Barnala	125	78	5	3	ii) 47 villages and 2 towns transferred from Barnala tehsil to newly created Tapa tehsil vide notification no. 1/5/2006-RE-II(i)/12611 dated 08.11.2006
Tapa	-	50	-	2	iii) 3 villages added in Census 2011 namely, Patti Bir Singh (7), Patti Deep Singh (8) and Patti Mohar Singh (9)

DISTRICT HIGHLIGHTS - CENSUS 2011

- Barnala district ranks 15th in area and 20th in population.
- Barnala tahsil is more populous as compared to Tapa tahsil.
- The average population size of village in the district (3,188) is greater than that of the state (1,425).
- Sehna(14,762) is the largest village in the district followed by Dhaula (10,819) in the district.
- 24 villages in the district are large sized with a population of 5,000 or more.
- The decadal population growth rate in the district (13.0%) is slightly lower than the state (13.9%).
- Barnala district is relatively less urbanized than the state (37.5%). It has 32.0 percent of its population in urban areas.
- The sex ratio in the district (876) is lower than the state (895). It ranks 17th among the districts in the state.
- The child sex ratio in the district (843) is lower than the state (846). It ranks 11th among the districts in the state.
- Barnala district contribution only 2.1 percent of the total population of the State.
- Out of total population of the district 68.0 percent is rural while 32.0 percent in Urban.
- The district has 31.3 and 3.8 percent main workers and marginal workers respectively of total population.

Section - I

Primary Census Abstract (PCA)

Brief Note on Primary Census Abstract

Introduction:

The Indian Census has the reputation of being one of the best in the world. The first Census in India was conducted in the year 1872. This was conducted at different points of time in different parts of the country. In 1881 a Census was taken for the entire country simultaneously. Since then, Census has been conducted every ten years, without a break. Thus, the Census of India 2011 was the fifteenth in this unbroken series since 1872, the seventh after independence and the second census of the third millennium and twenty first century. The census has been uninterruptedly continued despite several adversities like wars, epidemics, natural calamities, political unrest, etc.

The Census of India is conducted under the provisions of the Census Act 1948 and the Census Rules, 1990. In Censuses until 1931, a synchronous de-facto method was adopted wherein the Census was conducted throughout the country on a single night. This being a very costly affair and involved the deployment of very large force at one point of time was given up in 1941. Since then the same methodology has been followed in all the Censuses. It is a gigantic operation and considered to be the single largest, complex, peace time administrative exercise in the world.

The Census Operation in India is carried out in two distinct but inter connected phases - the House listing and Housing Census followed by the Population Enumeration. During the first phase of Census 2011 i.e., House listing and Housing Census, the buildings, census houses and households were identified and systematically listed in the House Listing and Housing Census Schedule during the period April to September, 2010 in different States/Union Territories. Apart from listing of houses, some useful data on the amenities available to the households was also collected for assessing condition of human settlements, housing deficits etc.

Censuses prior to Census 2001 had the system of collecting the information through Individual Slip which was a key schedule for every individual. The information collected through slip was then compiled for a household. Some information was also collected in addition to this for the household. During 2001 Census a comprehensive Household Schedule was adopted replacing the individual slip concept. In 2011 Census also similar household schedule was used for canvassing. The scope of demographic, socio-economic parameters has been widened in every census.

2. Population Enumeration - Census 2011:

The field work of the second phase i.e. Population Enumeration was carried out during February-March, 2011. One of the essential features of Population Enumeration in the second phase was that each person was enumerated and her/his individual particulars were collected at a well-defined point of time.

The Census moment and the reference date for the Census of India 2011 was 00:00 hours of 1st March, 2011. The enumeration was conducted

from 9th February to 28th February, 2011 alongwith a revisional round from 1st March, 2011 to 5th March, 2011 synchronously all over the country except for few specific areas of the Jammu & Kashmir, Himachal Pradesh and Uttarakhand states that remain snowbound in February. In these locations the population enumeration was done from 11th September, 2010 to 30th September, 2010 along with a revisional round from 1st October, 2010 to 5th October, 2010. The reference date for the census in snow bound non-synchronous areas of these states was 00.00 hours of the first day of October, 2010. In addition to the coverage during House listing& Housing Census, the enumeration of the Houseless population was carried out on the night of 28th February, 2011, as has been the usual practice. For the purpose of Census, certain areas where the access of the civilian enumerators was not permissible due to security reasons termed as 'Special Charges' such as the Defence and strictly Military/Para-Military areas, including operational areas were also covered. Such areas were not covered during the House listing& Housing Census. In addition to the defence/para-military areas, Special Charges also included certain factory areas, certain colonies, sensitive areas, scientific establishments, etc. These also formed Special Charges as these were not accessible by the usual census enumerator.

3. Quality Assurance:

A Task Force for Quality Assurance (TFQA) functioned under the chairmanship of the RG & CCI. Experienced officers of the different divisions of the organization i.e. Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division comprised the TFQA. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The main objective of constituting the TFQA was to subject the data to stringent validation checks and ensure its quality before release as it was expedient to be satisfied itself about the quality of data before putting the same in public domain.

The Directors and their senior officers were involved at all levels with respect to the quality and the coverage of their States/UTs. The TFQA intensively scrutinized coverage and content parameters including edit and imputation logic. The most important aspect of the data quality was to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, especially for small area population statistics. The content was scrutinized mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception was looked at to understand both the existing and the new emerging trends of population distribution and characteristics. A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2011 Population Enumeration results and finally clear them for use. The population data was cleared only after the full possible satisfaction of the TFQA.

The entire work relating to the data validation and scrutiny was completed by all the States/Union territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

4. Primary Census Abstract:

The Primary Census Abstract which is an important publication of 2011 Census gives basic information on Area, Total Number of Households, Total Population, Scheduled Castes, Scheduled Tribes Population, Population in the age group 0-6, Literates, Main Workers and Marginal Workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industry Workers, and (iv) Other Workers and also Non-Workers. The characteristics of the Total Population include Scheduled Castes, Scheduled Tribes, Institutional and Houseless Population and are presented by sex and rural-urban residence.

In 1981 census main workers were presented into four categories. As regards 1991 Census, the nine-fold industrial classification of main workers has been given in the Primary Census Abstract. One of the important features of the Primary Census Abstract of 1991 Census was the presentation of population of the age group 0-6 which is continued in 2001 and 2011 Census. All the children of age 6 years or less have been treated as illiterate even if the child is going to a school and may have picked up reading and writing. This will help the data users in better analysis and understanding of the literacy data as the literacy rate is calculated with 7 years and above population and it is referred as effective literacy rate. In 2001 and 2011 census four categories of main workers have been given in the Primary Census Abstract.

5. Level of Presentation of PCA data in District Census Handbooks:

The format of Primary Census Abstract (PCA) adopted in the DCHB of 2001 Census has been continued for 2011 Census as the data on four categories of works have been presented similar to 2001 census. The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts in DCHB is as under:

1. District Primary Census Abstract - District/C.D. Block/Town.
2. Primary Census Abstract for Scheduled Castes- District/C.D. Block/Town.
3. Primary Census Abstract for Scheduled Tribes - District/C.D. Block/Town.
4. Village Primary Census Abstract - C.D. Block/Village wise.
5. Urban Primary Census Abstract- Town/Ward level.

The PCA Data for villages was presented C.D. Block wise for the first time in 1991 Census. This practice is continued in 2001 and 2011 Census. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-

wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

6. Area Figures:

The area figures supplied by local revenue authorities of the district in respect of tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the C.D. Block are the total of the village areas coming under each C.D. Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level.
