SYMPATHETIC APPROVAL FOR: HOUSE: _____ GARAGE: _____ STABLE: _____ BARN: _____	
FENCE: _____ SHED: _____ TREE TRIM: _____ TREE REMOVAL: _____ SOLAR PANELS: _____ OTHER	
(Describe) : _____	

Architect or professionally prepared plans are not required for a sympathetic approval; however, submission for this preliminary review must include the following in concise detail:

- A \$100.00 check payable to the BVSA** (Applicable for new house, garage, stable, barn or shed over 120 square feet). This is a non-refundable review fee which is required each time a new set of plans is submitted for sympathetic approval.
- Plot Plan:** Two sets to scale showing property boundaries, setback distances and location of structures, trees (identify which to be removed/trimmed), septic tank, propane tank and screening, roads, and driveways.
- Floor Plans:** Two sets showing total square footage (show square footage of each floor if building is multi-storied). Include location and dimensions of garage, car port, decks, stairways, balconies, fireplaces, etc.
- Elevations:** Two sets of front, rear and side drawings to include exterior materials and colors. Show maximum total height.

I understand that sympathetic approval is only an approval of the conceptual plans. I agree to submit plans to the Environmental Control Committee for approval prior to any "work" on the Property.

**PAINT SAMPLE SHEET
 (Attach to Submittal)**

Paint Manufacturer	Paint Color / Stain
Siding:	
Trim:	
Fascia:	
Shutters:	
Doors:	
Garage Doors:	

NOTE:

- Paint manufacturer’s color chip, paint sample or color chart is required.
- All exposed metal must match surrounding area.
- All accessory structures must match the primary residence.

Light Reflective Value (LRV) is the two digit number on most paint charts and represents the LRV of that color. The higher the LRV, the lighter the color. The requirement is an LRV of “60” or less, in earth tones. Colors are at the discretion of the ECC.
