The partner of choice for healthcare institutions and the life sciences industry

Our ambition is to help care providers and researchers achieve their goals: protecting life

Getinge is a leading global provider of innovative solutions for operating theatres, intensive care units, sterilisation departments and professionals involved in the life sciences industry.

people's daily lives, today and tomorrow. Getinge's innovative and technologically advanced products allow you to do your job under constantly improving conditions, with precision, speed and efficiency.

Based on our first-hand experience and close partnerships with clinical experts, healthcare professionals and medical industry specialists, we are improving

Today, more than 10,000 Getinge employees across 40 countries are dedicated to improving the quality of life of your patients.

2005

Acute Care Therapies

Surgery and ICU

Supporting clinicians in providing vital care to patients in critical surgical and ICU situations. Offering the best minimally-invasive treatments to heart and vascular surgeons.

Anaesthetists, ICU specialists, heart, vascular and endovascular surgeons, perfusionists, nurses, pharmacists and biomedical engineers, among others.

Surgical Workflows

Operating theatre and decontamination

Supporting healthcare institutions in designing and implementing efficient and effective technical platforms in the operating theatre, endoscopy and sterilisation departments, and in optimising the flow of sterile medical devices.

Pharmacists, surgeons, nursing staff, biomedical engineers, hygienists, clinicians, construction and design engineers, among others.

Life Sciences

Industry and laboratory

Supporting life sciences companies and laboratories in protecting operators and their environment, optimising productivity and reducing running costs.

Researchers, operators, project managers in laboratories, biopharmaceutical and medical device production companies, among others.

Our aims

Our partners

Getinge Care

Our aims

Due to our range of modular services and training, we support users and maintenance managers in optimising the handling and availability of equipment.

Our partners

Users, technical services and biomedical services departments, among others.

Acute Care Therapies

Surgery and ICU

Because every second counts, our aim is to support clinicians on a daily basis in managing patients in critical situations in surgery, anaesthesia, intensive medicine, resuscitation and emergencies, while ensuring their safety.

We offer an extensive range of products aimed at providing solutions in the cardiac, pulmonary, vascular and endovascular fields, from large-scale equipment to implantable medical devices. Our goal: to help clinicians improve the outcomes and quality of life of their patients.

As a privileged partner of ICU specialists, among other things, we offer them circulatory, pulmonary and advanced haemodynamic monitoring systems. We also have a presence in the operating theatre, with innovative solutions specifically for anaesthesia, heart, vascular and endovascular surgery.

Nearly 120,000 Servo products used worldwide.

A major player in ventilation innovation for over 40 years.

Servo-U

Our challenge: to help you ventilate your patients safely and comfortably, while providing the tools to improve patient-ventilator synchrony, reduce sedation requirements and favour withdrawal.

A single platform, for multiple therapies.

The only approved system for transporting patients by air.

Cardiohelp

Stabilising heart and circulatory function is vital in treating patients in critical situations. Our Cardiohelp Extra-Corporeal Membrane Oxygenation (ECMO) system restores cardiopulmonary function in order to gain valuable time and save patients' lives.

PulsioFlex Due to our expertise in advanced monitoring, we can guide you in identifying the most appropriate treatment for each haemodynamically unstable patient.

Endoscopic vessel harvesting (EVH) is at the forefront of technological advances that improve vessel harvesting for coronary artery bypass graft (CABG) surgery.

Counterpulsation

Intra-aortic balloon counterpulsation therapy is the first-line treatment for patients requiring cardiac assistance.

Artificial Grafts

PTFE, Hybrid (PTFE + Polyester) and polyester ranges, impregnated with heparin or antibacterial agents to optimise treatment of vascular diseases.

Designed in collaboration with clinicians to ease your daily work in the fast-paced operating theatre.

Reduce the risk of hypoxia with O₂Guard.

Anaesthesia
Innovative solutions helping you reduce consumption of halogenated compounds and freeing-up time to care for your patients.

Over 12 years of clinical experience, with 150 publications.

Worldwide leader in covered expandable balloon stents.

V12
With its PTFE encapsulation and open cell design, the Advanta V12 stent has post-expansion and flare capability to suit all anatomies.

Surgical Workflows

Operating theatre and decontamination

We have brought our expertise to the areas of steriliser design and operating theatres, providing healthcare institutions with reliable and multi-functional operating theatres and endoscopy departments the possibility of managing contamination risks and improving operational efficiency.

We offer a wide range of products and solutions for technical platforms, and contamination control. Complex infrastructures, turnkey operating theatres, patient flow and medical device management software, operating tables and lighting, surgical arms, sterilisers and washers are our daily answers to customers' problems.

Our goal: to provide key players with effective tools aimed at improving their workflow and patient safety. In addition to our products, we are partners and advisers in all areas of the operating theatre and sterilisation: expertise, service delivery, advanced project management, training and financial support.

Turbo multitasking technology can reduce processing time by up to 25%.

The turbo version uses the lowest possible amounts of water, detergent, and energy for a product of its size, reducing your overall environmental impact.

Getinge 86-series

The Getinge 86-series washer-disinfectors are premium resource for your CSSD. Each model is easy to load, operate, and maintain, improving employee workflows for increased efficiency.

Over 2,500 operating theatres are equipped with a Maquet table.

The answer to complex surgeries, such as obesity.

Maquet Meera Mobile Operating Table

Meera is used for all surgical disciplines, from general surgery to orthopaedics and also neurosurgery.

Operating lights

Dependable lighting solutions to enable the medical team to focus on patients.

Operating Tables

Maquet operating tables are the result of developments made in collaboration with medical staff to achieve an optimum solution for all surgical disciplines

Ceiling supply unit

Ceiling supply units allow space to be given to the patient, creating a more ergonomic and orderly environment and contributing to the multidisciplinary use of the operating theatre.

Stericool A-series Low-temp sterilisation

Performing chemical sterilisation using steam and formalin (formaldehyde dissolved in water) – a very safe and well-proven method.

Modular room systems

Variop (wall and ceiling elements) is designed for your operating theatres, in accordance with the most stringent requirements. Simple to install and easily dismantled, it provides a perfect modular solution for a constantly evolving operating theatre.

Endoscope washers

Our automated endoscope reprocessors efficiently perform leak testing, cleaning and high-level disinfection of flexible endoscopes, delivering effective, reliable results.

Traceability

T-DOC ensures individual traceability of surgical instrumentation at all times. This software provides a constant link between sterilisation and the operating theatre, aimed at optimising instrument flow.

Connected solutions

Getinge Online is the enabler of Getinge Services that ensures the highest performance and availability of your Getinge equipment and access to valuable information via your personal web portal

Consumables and accessories

A full range of detergents, neutralisers and indicators for managing instrument washing and steam sterilisation that optimise the performance of your operating theatre and sterilisation equipment.

Life Sciences

Industry and Laboratory

Our commitment to life sciences companies and laboratories is to protect their operators and their environment, and optimise productivity while reducing running costs.

Getinge brings together a comprehensive offering of life sciences products, services and advice, helping our customers to increase their productivity and obtain reliable results.

Our expertise and the uniqueness of our product range enables us to support our clients from the design of their projects to their implementation, and the fulfilment of our agreements.

3,000 isolators installed worldwide.

Over 50 years of experience in the field.

Isoflex-R™

Isoflex-R™ is the modular economical isolation solution, aimed at providing high-level traceability, ergonomics and elimination of contamination risks. Isoturn™, with its compact bio-decontamination air lock, enables loads to be transferred following a 10-minute “flash” cycle.

Pioneers in the field, with 25 years of expertise.

More than 600 washers installed worldwide.

GMP Washers

Automated washing, certified according to GAMP5 requirements and FDA recommendations for cleaning pharmaceutical filling line apparatus.

Getinge Steam Steriliser

Autoclaves designed and certified for processing exposed equipment and waste in high-security BSL3 and BSL4 restricted laboratories and the GAMP5 range for sterilisation of equipment and media in accordance with FDA recommendations.

ULTIMA laboratory washer

The most complete range on the market for cleaning glassware. Whatever the washing problem, a Lancer washer has the solution.

Isolator

A sealed area equipped with handling and transfer media, which can be H₂O₂ bio-decontaminated, allowing crossed operator/product protection against microbiological contamination.

Lancer LSS laboratory steam steriliser

Multiple-option autoclaves, for standard laboratory applications and sterilisation of solid and liquid loads.

DPTE® System

Double door for sealed transfer, enabling the transfer of sensitive or hazardous solids and liquids in a sealed space without a break in containment.

GEW GMP Washer

Washer designed and certified according to GAMP5 and the FDA to ensure effective and repeated cleaning of tools and glassware used in production by the pharmaceutical industry.

40,000 Alpha DPTE® units are used worldwide, with no break in containment

DPTE®
The patented Beta DPTE® system allows bi-directional transfer of sterile or toxic products in a production chamber.

There are several soft wall or rigid Beta DPTE® models, for all manufacturing and sterilisation processes.

More than a million transfers take place via our DPTE® doors every day in the pharmaceutical industry.

Getinge Care

Take care of your investment

Our Getinge-certified field service representatives and Getinge original parts are your best investment in maximising the life span of your equipment.

Maximising equipment performance should not need to strain your budget. Our four levels of service packages are designed with your

hospital's success in mind. Whether you have a full service department on site, or limited in-house personnel, we can meet your needs.

Ensuring safety

There is nothing more important than protecting patient health. Each day, your clinical staff relies on our equipment to deliver top tier care for their patients. With Getinge Care, we will be there to ensure that your equipment is operating safely and reliably – every time.

Protecting performance

You need the right equipment at the right time. By following a routine preventive maintenance schedule, Getinge Care keeps things running smoothly, with minimal interruption. If something should need urgent attention, our certified field service representatives will be there to promptly support you and resolve the issue.

Preserving your budget

With a Getinge Care package, you can forecast your costs for the full life cycle of your equipment, minimising unplanned costs. Our financial services team can analyse your needs and numbers to deliver a service package that gives you the best output for your investment.

Getinge Academy

Knowledge that saves lives

Established in 2006 our UK Academy has earned a reputation for providing high quality and affordable training, along with the positive impact we have on our customers as they use their skills and knowledge to make a difference for themselves, and more importantly patients and clients.

At Getinge Academy, our dedicated trainers are proud to help with your quality work. Having the right knowledge, competence and

being able to make the right decisions is vital for you and your team through therapies and when handling equipment. To stay updated with the right skills is motivating, boosts performance and patient outcome as well as productivity.

From E-Learning to on-site training days we provide comprehensive training and support to the primary operators of our products.

Getinge Flexible Commercial Solutions

Unlocking investment in healthcare

Getinge's Flexible Commercial Solutions offers a way to unlock vital investment without putting further strain on capital budgets. We will work with you as partners, enabling you to spread the cost over time, while minimising the risks associated with major projects.

You will get the latest solutions – from acute care therapies to operating theatre equipment and instrument reprocessing – maintained to guaranteed availability throughout the life of the contract for a fixed cost.

Our solutions will:

- ✓ Improve efficiency and productivity.
- ✓ Deliver better, safer, more effective patient care.
- ✓ Put you in financial control.
- ✓ Maximise your flexibility with options to add equipment and make changes during the contract.
