

Installation Instructions

Installation Steps

STEP 1

Clean the wall surface making sure that it is dry and free of any dirt, dust, loose paint, oil, wax and grease.

STEP 2

Apply construction adhesive to each wing of the corner guard in a zig-zag pattern.

STEP 3

Position the corner guard on the wall and apply pressure until the corner guard has achieved a tight fit. Additional bracing may be required during installation to hold the corner guard in place and in complete contact with the wall until adhesive cures.

STEP 4

After the corner guard is installed, remove the protective covering.

Storage & Handling

This is a finished product, store in a clean and dry area. Material must reach 65° F. min to 75° F. max 24 hours prior to installation.

Cleaning Instructions

For routine cleaning, including fingerprints, use warm water with a mild soap or an organic solvent (eg. Acetone, alcohol, methylated spirits), sponge rinse with clean water and wipe dry following the polish lines. For tougher stains and grease use an organic solvent, mild cleaning solutions such as Jif®, or specialty stainless steel cleaners. Use a sponge, rag, or soft fiber brush to clean, rinse well with a sponge and clean water and wipe dry following the polish lines. Always read the instruction and warning label on all cleaning products before use.

Caution

DO NOT walk on the corner guards.
DO NOT store anything on top of the corner guards.
