Arbeitsgruppe Pferd presents:

EQUINE HEAD SURGERY DAYS 2020

Lüsche, Germany
January 30 to February 1, 2020

This three-day course focusing on head disorders of the horse will provide participants with an in-depth overview of surgical approaches, techniques and outcomes for the most usual developmental and traumatic injuries.

The course is designed around practical wet-labs covering the techniques thought during the theoretical sessions.

Continuous Professional Education accreditation will be requested from ATF (Akademie für Tierärztliche Fortbildung = German Academy for Continuous Veterinary Education).

Expected outcomes

- At the end of the course participants are expected to be able to
- recognize, workup and establish a plan for traumatic and congenital head disorders
 - Perform surgical approaches to the sinus
 - Fixate rostral and mandibular ramus fractures
 - Deal with sinocutaneous tracts
 - Diagnose and treat temporohyoid disease

Prerequisites

- Knowledge and understanding of equine head anatomy
- Knowledge of basic surgical principles
- Familiarity with equine imaging techniques of the head

➤ **Why attend AGPferd courses?** Because there will be instructors of different professional and geographical background with outstanding knowledge and experience on the subject tackled.

➤ **What is different in AGPferd events?** We work in small groups of mostly very experienced participants. Apart from lecturing our instructors present their knowledge and skills in practical demonstrations. Plenty of time is always reserved for discussions. All this under professional conditions, with good food and in a collegial and relaxed atmosphere.
