LEVELIFT

BED TECHNOLOGY

DOESN'T JUST CARRY THE LOAD...LIFTS AND LOWERS IT TOO

WITH MDV'S PATENTED LEVELIFT™ BED TECHNOLOGY, YOU GET "UTILITY" THE MOMENT YOU ARRIVE AT THE JOB SITE. WITH A 750 LB. LIFT CAPACITY, LEVELIFT DOES THE HEAVY LIFTING.

LOAD - Flip the switch and the LevelLift bed technology brings the cargo box up, back and down, enabling you to load at ground level or at any point along the bed's arc of motion.

LIFT - Once loaded, the LevelLift bed single-handedly brings the cargo box back up and into position on the MDV. With minimal time, effort and man-power, you and your cargo are on your way.

DUMP - LevelLift bed technology also enables loads to be dumped at any height or distance along its arc of motion, providing owners more options for where and how their cargo can be unloaded.

HUSTLER MDV™

WITH PATENTED LEVELIFT™ BED TECHNOLOGY

Imagine a tough, precision-built utility vehicle that combines the industry's most popular features with the ability to lift, lower and dump its cargo at any point along its arc of motion. That's what the most innovative team in the turf industry has created in the Hustler MDV with patented Levelift bed technology. We call it the MDV ("Maximum Duty Vehicle") for the simple fact that you won't find a more rugged, more durable, more versatile utility vehicle in its class than this one.
