Keynote by Fred Powers and Stan Zanarotti	
14:00 CEST	<p>What's new in Diver Platform and what is in the works for future developments?</p> <p>The keynote sessions at the Diver Conference will feature the 2 co-founders of Dimensional Insight, Fred Powers and Stan Zanarotti. Fred and Stan will provide our users with a look at our newest technology and where Dimensional Insight is heading in terms of technology advances.</p>

	Healthcare track	Logistics & Finance track	Diver Expert track
14:45 CEST	<p>Data Lessons Learned from the COVID-19 Pandemic</p> <p>Seattle based EvergreenHealth was the first health system in the United States to be severely impacted by the COVID-19 crisis in February 2020 following an outbreak at a nearby nursing home. While there was no playbook available on how to manage the COVID-19 pandemic, leadership understood that data was critical to the hospital's response.</p>	<p>Diver 'Control Tower' gives DSV's customers insight into their operations</p> <p>Many companies outsource their logistics operations to the global transport and logistics company DSV. Part of DSV's service to their customers is offering an operational dashboard which acts like a 'control tower', providing an overview of processes and monitoring key performance indicators. In this session we will put the spotlight on DSV's dashboards and explain the use cases.</p>	<p>Diver tips & tricks: front-end</p> <p>In this session we will demonstrate examples of new functionality in DivePort. Combined functionality gives flexible charts, user adapted reports, adjustable stamps and more.</p>
15:10 CEST	<p>How the Diver platform allows multiple organizations to co-operate to improve youth health outcomes</p> <p>Learn how Dimensional Insight in the Netherlands supports youth healthcare with operational performance reporting and a workflow solution that helps youth healthcare providers to collaborate, track children and provide transparency for local authorities.</p>	<p>How to avoid teddy bear metrics?</p> <p>Teddy bear metrics give you a warm fuzzy feeling, but don't really help your organisation at all. Learn how to avoid them in an inspirational presentation by Shaun Foaden.</p>	
SHORT BREAK			
15:45 CEST	<p>Process Improvements in the Irish Health Service</p> <p>In this presentation Steve Gillman from Manitex will cover 3 different areas where Diver has contributed to continual performance improvement in the Irish health services - Acute Teaching Hospitals, Endoscopy Medicine and Community Mental Health Services.</p>	<p>Diver application cuts 95% off manual processing time</p> <p>Learn how the Irish oil distribution company, Corrib Oil, uses Diver's input; production; administrator and web reporting tools to create an end-to-end application which reduces their previous data processing time by 95%.</p>	<p>Diver tips & tricks: back-end</p> <ul style="list-style-type: none"> - Learn how Workbench works for you - Learn what's new with Spectre. - DI Toolkit: learn how to control your implementation regarding all involved files, fields, pages, users, performance and find all the relevant statistics about your environments.
16:05 CEST	<p>Using Diver for Orthopedics and Standardized Care Processes</p> <p>In this case study from Healthcare Region Jönköpings län in Sweden, Anna Forsberg (controller) will talk about "State of health" dashboard for clinics, starting with orthopedics. Johan Assarsson (investigator) will talk about how to adapt to National Standardized Care Processes and be flexible at the same time.</p>	<p>Data-driven Credit Management: integrate external data for assessing credit risk in Diver</p> <p>Data analytics is one of the disruptive ways through which organizations can effectively monitor credit risks and minimize exposure to risk. In this case study, Gunnar Haugen from BI Partner in Norway and Ronni Pedersen from IT Vision in Denmark will show how to combine internal company data with external data from to support operational credit decisions.</p>	

Special DivePort design workshops on Friday 11/6
