

Health & Safety in Design

416-1

GRI DESCRIPTION

Assessment of the health and safety impacts of product and service categories.

CHOW:HILL METRIC

Numbers of design projects for which a Health and Safety in Design Risk Register has been implemented.

TARGET

100% of all new projects that qualify as requiring a register will have one prepared and ongoing through the project.

COMMENTARY

We are required to participate in the establishment and implementation of Health and Safety in Design Risk Registers for projects in which the design, construction, operation and maintenance of buildings and other structures in which constructors, users, residents, visitors or the public are at risk of harm, injury or death. These can be prepared by Chow:Hill or we may contribute to processes managed by others such as project managers and other consultants.

PERFORMANCE

119 new projects were commenced.

Of these, 44 required HSID registers to be prepared and / or Chow:Hill project team members participated in the process.

The total HSID registers prepared and / or with Chow:Hill project team members participating in the process was 27.

IMPACT

The potential impact of a health and safety issue can range from minor to catastrophic and it is incumbent on our company to ensure we have contributed as fully as we can in eliminating risk.

TARGET 2019-2020

100% of all qualifying projects will have an HSID register prepared.
