BOY WITH A BALL

Our name came from a little boy's discovery that the ball he was clinging to as a security object could be used for so much more. We help people use the lives in their hands to love and transform cities.

Coordinator

BOY WITH A BALL | 2019 ANNUAL REPORT

There are many words we think of when we look back on 2019- full, exciting, transformational. Though there are many words we could choose, what we know about 2019 is that it was an incredibly important year. It was a year of building up and out. Our organization grew on all fronts- in programs, within teams, and in who we are. Our Velocity program in Atlanta more than doubled in size. Fikisha, Boy With a Ball Kenya, celebrated their 10th anniversary. El Niño y La Bola Nicaragua grew after a year of revolution in their country. We all stepped deeper into Love Your City, our method for community transformation, and as we did, leaders, young people, and families were changed by the work of collective care.
