

# SMART HOME SECURITY

NO CONTRACT, SIMPLE TO INSTALL, NO HASSLES

## WHAT IS THE HOMEOK SERVICE?

"Think of HomeOK as your own private mini security guard."

The system monitors and notifies you instantly when something happens in or around your home, protecting the people or things you love.

The system filters only essential information without you watching hours of video. You see what happened instantly and can take action, saving you time whilst also protecting your data.

## DATA IN YOUR CONTROL

The data is analyzed on your Gateway by your "Mini Security Guard", which is the Artificial Intelligence at work.

After analysis, the important information defined by you is sent to the cloud to access through your APP. The "Mini Security Guard" automatically deletes the data that is not important.

Not stopping there, to give you total control, you can delete all data in the cloud at the push of a button within the app.

Simply your data in your hands.

	Platform: H80	
		Gateway between the service and the service kit.

The Camera and sensors communicate with the Gateway via the WIFI network.

# GATEWAY

## H80

The Intelligent gateway connects all cameras and sensors, enabling access via the HomeOK app from anywhere in the world.

In addition, the gateway is the interface for the control and individual configuration of the cameras and sensors via the smartphone app for iOS and Android.

-  Connect up to 40 sensors and three cameras to the Gateway.
-  The AI computes 'OK' or 'Not OK' and detects alarm signals and people.
-  The Gateway filters irrelevant information, and notifies you within seconds to ensure that you never miss an important moment.

The Gateway has a sleek design and is the 'mini security guard' in your home.

	<b>Platform: NG10</b>		
		Only important information is saved as photos.	
		Speaker and microphone functionality.	
		Recognizes taught alarms	

The base is designed so you can adjust and rotate your camera to the optimal position.

# CAMERA

## NG10

With the newly developed, robust 360 degree stand, you can position the camera in every corner of a room without any problems.

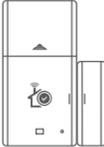

The intelligent camera recognizes important changes in the picture. It comes with a built-in microphone that can detects alarm signals you tell it to . The integrated speaker becomes the Speech output for extra functions.

The camera sees well in the light and in the dark with Infra-red nightvision.

The camera has an in-built speaker and microphone.

-  NEW: Next generation camera with improved image quality and Infra-red.
-  The camera informs you when there is a change in the image. It will send you only the important information.
-  Can be taught to listen out to your current smoke alarm and notify you within seconds anywhere you are.

	Platform: NG01	
	Recognizes open or closed.	

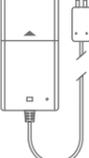

# DOOR/ WINDOW SENSOR

You can monitor important doors and windows easily and reliably and know instantly when they open or close. Also kitchen cupboards, baby gates or garden sheds can be kitted with this sensor. And most importantly, you get to decide if open or closed is good or bad.

-  The magnetic sensor identifies if the open / close status changes.
-  Sends a notification to your phone immediately. The status change is timestamped and you can view its history to check status changes for up to 7 days.
-  Can be used in combination with a Camera to set the status changes as a voice message output.

Simple to install and discreet on windows and doors

	Platform: NG02	
		Detects contact with water.

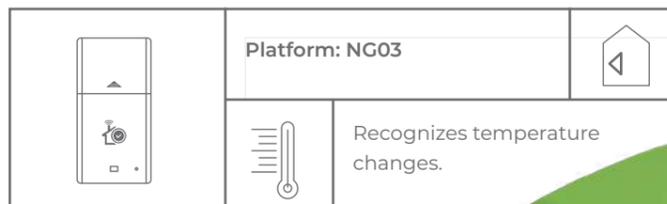

Probe with sensor contacts.

# WATER SENSOR

Automatically get notified of water leaks or water levels.  
Too much or no water? You can decide what you want to keep an eye on.

-  Sensor detects leakage or a lack of water.
-  Sends a notification immediately to your smartphone.
-  Can be used in combination with a Camera to output a voice message when the sensor is activated.

The sensor can monitor for water leaks or if the plants need water.

# TEMPERATURE SENSOR

Is the dog OK on a hot summers day? Or the baby-room? Monitor temperature changes in important areas at all times. With our temperature sensor you can easily monitor important areas and receive a notification when the temperature is outside of the defined range.

- Sensor for temperature monitoring in closed rooms.
- Sends an immediately notification to your smartphone, when the the temperature is outside of the defined temperature range.
- Can be used in combination with the Camera's Speech function to output a voice message if the temperature range is crossed.

Simple installation with the supplied adhesive strip - even on uneven surfaces.

	Platform: NG05	
	Multi-functional push-button that works with your sensors.	

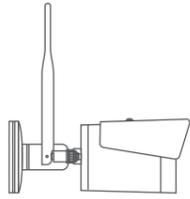

# PUSH BUTTON

The push button is an all-round easy-to-use control, be it for switching camera recordings on and off or to communicate a custom message via voice output. Fixed or mobile: the cordless and battery-operated Push button can be placed anywhere it is needed or even carried around, as long as it stays within reach of the Gateway.

-  A simple to use remote control to control the functions of sensors and cameras, e.g. recording start/stop.
-  Ask the status of all sensors.
-  Use with the rubber cover Accessory to use your PUSH outside and make it splash-proof (IP44).

The PUSH button colourful range of rubber covers is splash-proof for outdoor installation and use and to suit your PUSH.

	Platform: NG07 	
		Only your important moments are saved as photos.
		Text to speech functionality.
		Can be taught to listen out for alarms.

Built-in speaker and microphone functionality.

# CAMERA

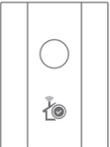

## NG07

The quintessential outdoor camera. With a viewing angle of 82 °. Keep an eye on the outside area around your home at all times and get notified when something's up.

The artificial intelligence built into the camera knows to separate important from unimportant movements and only informs you when it is relevant. The durable design is sturdy, weather proof and water-repellent.

-  New: Intelligent camera with special focal length for the monitoring of outdoor areas.
-  New: Next generation speaker and microphone technology.
-  New: IP65 dustproof and protected against water jets from any angle

Can detect the sound of a smoke alarm or any other alarm you teach it.

	Platform: NG04	
		

The wall mount accessory for the motion sensor is suitable for indoor and outdoor use and is weather proof.

A nifty sensor shield can be attached to regulate the sensitivity of the sensor for pets or insects.

# MOTION SENSOR

Detect movement inconspicuously and get notified within seconds. The highly sensitive infra-red motion sensor reliably detects every movement in-doors.

-  Highly sensitive Infra-red sensor to detect movements, even in the dark.
-  Sends notifications to your smart phone if motion is detected.
-  In combination with a camera you can see what or who is moving about your home at all times.

	Platform: NG12	
		

Interchangeable covers for a personal touch.

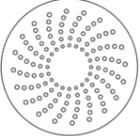

Sensitive touch-plate.

# PUT SENSOR

Perhaps the smartest scale in the world. With the PUT sensor you can check whether all important things in your home are in place and find their way back after they have been used. Use it for keys, wallets, or jewelry, important documents or fire extinguishers, anything you need to know about.

-  Sensor for measuring weight for objects up to 5 kg.
-  Sends a notification immediately to your smartphone if the weight is over- / under the set range.
-  Can be used in combination with a Camera to trigger a voice Speech function to notify its user.

	Platform: NG30		
		Text to speech.	
		Listens for alarm signals.	

Powered by a micro-USB connection.

# PLAY

With the PLAY from HomeOK you will be informed of any alarm going off in seconds. thanks to the integrated microphone, you can teach the PLAY sensor to catch any sound, for example, set PLAY to recognize the alarm or fire alarm and be notified immediately. The integrated loudspeaker can also indicate sensor status and can be set to output speech , or scare-off intruders.

-  The microphone detects alarm sounds and notifies your smart device within seconds.
-  The speaker can be used for voice message output, e.g. a notification of a sensor status change.
-  Can be used as the speaker for your push button voice output.

Multi-functional speaker that can talk to Google Home or Alexa.

+		Platform: NG97 – Magic Pad	
		Attach sensors to any surface without tape or screws.	

## MAGIC-PAD FOR SENSORS

The magic-pad is designed to quickly mount a sensor in a temporary or semi-permanent position without the need for any screws or double-sided-tape.

This makes it easy to adjust your sensors and move them about the house where more security is needed.

Glass

Metal

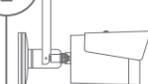

Mat

Wood

+		Platform: NG97 for Camera	
		Mount the outdoor camera without drilling.	

## OUTDOOR CAMERA STAKE MOUNT

The highly durable stake mount for the outdoor camera allows you to start improving your security without the need to drill or screw the camera into a fixed position.

Easily attach the outdoor camera to the stake mount with the three screws and adjust the height and position in a jiffy.

Outside

Inside

Extendable

Inconspicuous

## ARTIFICIAL INTELLIGENCE

The intelligent "AI Gateway" analyzes all data quickly and precisely. Only relevant data is directly transferred to the cloud, which runs on the highest quality German managed and data compliant servers. Within seconds the data is transferred and available to you in the HomeOK app. Irrelevant data is recognized as such, filtered out and irrevocable deleted.

## PRIVACY

Image and sound recordings are encrypted. Only you and people you allow can view and listen to the recordings. All data HomeOK collects is stored for seven days. You can also access all recorded data at any time and delete it from the HomeOK app.

## INSTALLATION IS PLUG-AND-PLAY

The service kit requires a simple installation of removing a battery strip and pairing it with the app. No need to book appointments or unnecessarily wait for professional installation teams. Simply follow the guide, and within minutes you can have your system processing important information to improve your security.

Anything that happens in or around your home when you are not there can be essential to know. It's up to you.

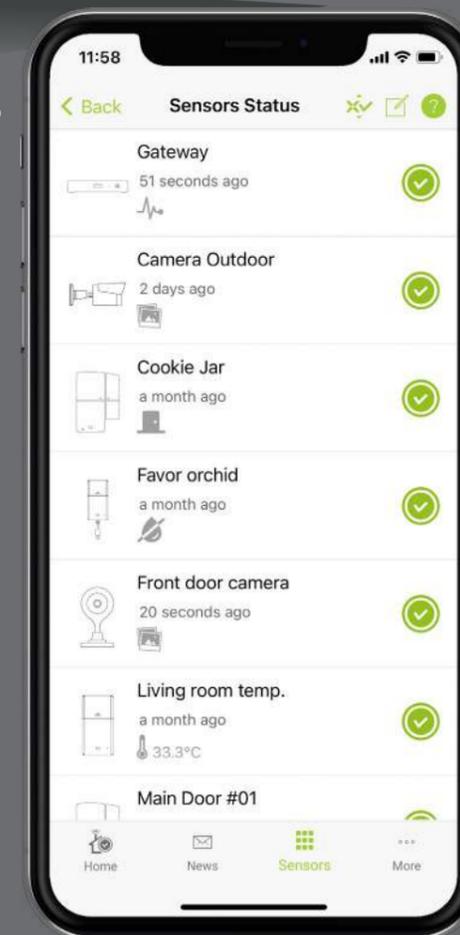

Catch moments in and around your home (even in the dark) such as water leaks, doors opening or windows left open, freezing cold temperatures and many more. Easily expand your service kit with more sensors and cameras to suit your needs.

## ONE KIT. ONE APP. PEACE OF MIND.

Simple to Install. Simple to use.

The free app is available for IOS and Android users. The HomeOK service is designed with a focus on convenience, and so the app is super easy to use. If you need any extra information there are plenty of tutorials and step-by-step guides on our website available to make sure you get the most out of the HomeOK service.

Share the app with upto 10 guests and install it on different devices like ipads and computers.
