

	Platform: NG03	
		Recognizes temperature changes.

TEMPERATURE SENSOR

Is the dog OK on a hot summers day? Or the baby-room? Monitor temperature changes in important areas at all times. With our temperature sensor you can easily monitor important areas and receive a notification when the temperature is outside of the defined range.

- ✓ Sensor for temperature monitoring in closed rooms.
- ✓ Sends an immediately notification to your smartphone, when the the temperature is outside of the defined temperature range.
- ✓ Can be used in combination with the Camera's Speech function to output a voice message if the temperature range is crossed.

Simple installation with the supplied adhesive strip - even on uneven surfaces.
