SUMMARY

- Over 15 years of SAP experience implementing Materials Management, Inventory Management, and Warehouse Management.
- Designed and implemented the SAP Processes S/4HANA upgrade strategy for USA and European Manufacturing Plants.
- Responsible to defined On-Premises Compatibility Scope to support SAP ECC application functionality migration to SAP S/4HANA, including manual and automated cutover activities.
- Analyzed, gathered, designed, developed, implemented, integrated, and maintained SAP applications, which included Supply Chain Management, Material Management, Warehouse Management, and Procurement Processes.
- Mapped business requirements through Quick Gap Analysis. Understood business processes, studied & analyzed design solutions, and ensured smooth coordination with the Development Team.
- Worked on procurement cycle- Purchase requisitions, RFQ, Quotations, Vendor selection, Purchase orders, Goods receipts, and Invoice verification.
- Worked on Output Determination settings for Purchase Orders, Stock Transport orders, and Inbound Delivery and Outbound Delivery Documents to support the Interfaces.
- Experienced in IM activities of Goods Movements, Logistics Invoice Verification, Account payables, Physical Inventory, Cycle counting, and stock movement and valuation.
- Excellent knowledge of the configuration of Release strategies for Purchase Requisitions and Purchase Orders.
- Configuration experience in bin structure, Storage Search activity, Cross Docking, put away and Picking strategies, and Print control in WM Module.
- Worked on various delivery types, stock placement and stock removal strategies, pick lists, special stocks, inbound and outbound deliveries, and goods issues for the sales order.
- Worked on Handling Unit Management and Storage unit management with RF Functionality.
- Good experience in developing interfaces using ALE/IDOC, RFC, BAPI's, and Adobe forms.
- Monitored and uploaded Master Data SAP using LSMW and BDC.
- Sound knowledge in project documentation of the creation of functional Specs and design documents, test case preparation (UTS, UAT, ITS/SFT) and training, and cutover planning.
- Integrated with other systems and modules, coordinated integration and user acceptance testing, and extended Post Go-live support.
- Imparted training support to end-users on system functionality.

WORK EXPERIENCE

December 2019 – Present
Fresenius Kabi USA, Chicago, IL
Lead SAP (MM/IM/WM/LE) Consultant

- Worked on end-to-end processes – Purchase orders, STO's intra, and intercompany scenarios, and customized transfer STO processes.
- Worked on MES enhancement projects integration with EWM and Production Support activities.
- Configured the design review prototype in the development system for all the business processes and executed each scenario with the stakeholders prior to the Design Review sessions.
- Worked on the development and design of new enhancements to MU-PU (Marketing Unit to Production Unit) process.
- Configured Procure to Pay and Inventory management changes, ABAP modification requests, and new developments as per requirement.
- Worked on issues related to subcontracting purchase orders such as Bill of Material and Info records and agreements.
- Worked on interfaces to the 3PL warehouse management system to send/Receive Outbound deliveries, inbound deliveries, arrival, and shipping notifications.
- Provided functional support for enhancements related to additional MM/IM functionalities and reports.
- Worked on EDI IDoc interfaces to 3PL systems on the purchase order, Outbound deliveries, inbound deliveries, ASNs, and Inventory Adjustments advice.
- Prepared functional specifications, design documents, Test Plans, Test Cases, and requirements mapping to test cases and Test Procedures.

June 2018 – November 2019
Takeda Pharma, Chicago, IL
Lead SAP (MM/IM/WM/LE) Consultant– Implementation
- Implemented the US BPR system for supply chain execution modules, such as MM IM LE.
- Configured all cross-functional objects and master data objects as per the global template.
- Worked on end-to-end processes – Purchase orders, STOs intra, and intercompany scenarios, and customized flash transfer STO processes.
- Configured the design review prototype in the development system for all the business processes and executed each scenario with the stakeholders prior to the Design Review sessions.
- Worked, configured, and tested Inbound, outbound, and transfer posting processes.
- Worked on interfaces to the 3PL warehouse management system to send/Receive Outbound deliveries, inbound deliveries, arrival and shipping notifications, and Inventory Adjustment advice.
- Configured automatic route determination and worked on new enhancements to update the vendor batch and NDC number in inbound delivery.
- Worked on procurement cycle - Purchase requisitions, RFQ, Quotations, Vendor selection, Purchase orders, Goods receipts, and Invoice verification.
- Configured the Release strategies for purchase requisitions and purchase orders.
- Provided Functional support for enhancements related to additional MM functionalities and reports.
- Worked on interfaces using ALE/EDI technique.
- Created Functional Design, Specification documents, Test Plans, High-Level Test Documents, Test Cases, requirements mapping to test cases, and Test Procedures.
- Developed and maintained Test scripts, interacted with team members, and provided guidance in the end-to-end testing process.

November 2017 – June 2018
AbbVie Inc, Chicago, IL
Lead SAP (MM/IM/WM/LE) Consultant

- Provided Production Support for different landscapes for all countries worldwide and troubleshoot SAP functional issues in supply chain execution modules, such as MM IM WM LE.
- Designed and implemented the SAP Processes for Global LIMS (Lab Vantage) and S/4HANA upgrade strategy for USA and European Manufacturing Plants.
- Responsible to defined On-Premises Compatibility Scope to support SAP ECC application functionality migration to SAP S/4 HANA, including manual and automated cutover activities.
- Designed the process flow and framework for assessment capabilities for the SAP HANA to make available on the third-party system or data source such as Hadoop to provide deeper integration with SAP HANA, enabling high-performance analytics.
- Worked on end-to-end processes – Purchase orders, STOs intra, and intercompany scenarios, customized flash transfer STO processes, and Toll manufacturing process.
- Worked on Output Determination settings for Purchase Orders, Stock Transport orders, and Inbound Delivery and Outbound Delivery Documents to support the Interfaces.
- Worked on the configuration of Inventory Management, including Plant parameters for Inventory Management, Good Receipts, and Invoice receipts.
- Processed transfer postings and special stocks in Inventory Management such as sub-contracting, third-party, and vendor consignment.
- Worked on all support issues on the inbound and outbound processes, Handling Unit Management and Storage unit management issues.
- Carried out root cause analysis for the repeated problems and suggested/implemented preventive measures.
- Worked on interfaces to the 3PL warehouse management system to send/Receive Outbound deliveries, inbound deliveries, and arrival and shipping notifications.
- Followed the various business process of the clients, preparing specs and updating the daily activities in the tracking tool.
- Ensured resolutions provided were timely & effective and end-user training and monitoring.
- Created and executed the Test scripts, interacting with team members and providing guidance in the end-to-end testing process by following SDLC processes and working with SQA.

April 2016 – October 2017
Mondelez International, Chicago, IL
Lead SAP (MM/IM/WM/LE) Consultant
- Mapped business requirements through Quick Gap Analysis. Understood business processes, studying & analyzing to design solutions.
- Prepared Detailed Process Flow for functional requirements and validated the design documents.
- Worked on the configuration of Inventory Management, including Plant parameters for Inventory Management, Good Receipts, and Invoice receipts.
- Configured Storage types, Storage Sections, Storage Bins, Document Number range, Storage Type activity, put away strategy, Picking strategy, and Print control.
- Worked on Handling Unit Management and storage unit management configuration setup with RF enhancements.
- Tested the functionality and preparation of test data and testing the developed objects and involved in test case executions in HPQC– HP Quality Centre.
- Identified the existing interfaces, user exits, reports, and function modules and leveraged to user standard IDOC interface to be modified as per the new design.
- Provided development support for Forms and Reports and prepared the Integrated and System functional test scripts.

June 2015 – March 2016
Hospira, a Pfizer company, Chicago, IL
Lead SAP (MM/IM/WM) Consultant

- Worked on Device Track and Trace Data Migration projects. This role included examining the data available in an existing data source from iNet, Visiprise, and Track wise systems.
- The engagement involved data migration from the Legacy system to the SAP system via BackOffice for SAP implementation.
- Analyzed the migration reports and got the correct data from clients for erroneous records.
- WM enhancements - Designed and implemented the Sample Automation process. The withdrawal process determines the storage units of sample withdrawn for materials received into inventory and facilitates the consumption of sample materials, covering the end-to-end process from Goods Receipt to Samples issue to quality.
- Worked on Handling Unit Management and storage unit management configuration setup.
- Worked on RF enhancements for Create Handling Unit, put away storage unit (Handling Unit) to other storage bin, Split or Combine operation for Storage Unit, Perform Picking process for a serial number in outbound delivery and Pick against delivery.
- Tested the functionality and preparation of test data and tested the developed objects and was involved in test case executions in HPQC.
- Identified the existing interfaces, user exits, reports, and function modules and leveraged to user standard IDOC interface to be modified as per the new design.
- Involved in test planning, writing test cases/scripts, test case automation, and test execution in HPQC.
- Responsible for business continuity adhering to the SQA process, and process compliance.

September 2014 – May 2015
GE Energy, NC
Lead SAP MM/IM Consultant

- Involved in business meetings, understanding the AS-IS process, and preparing high-level Design Documents Mapping Templates and Solution Summaries.
- Mapped business requirements through Quick Gap Analysis. Understood business processes and studied & analyzed them to design solutions.
- Worked on Global Template roll-out for GE Business for MM and WM module with integration to LE.
- Worked on enhancements to update the batch and serial numbers in inbound delivery and auto-determine batch and serial information in outbound delivery.
- Automated the goods receipt and goods issue postings based on arrival notification and shipping notification information from 3PL.
- Configured Storage types, Storage Sections, Storage Bins, Document Number range, Storage Type activity, put away strategy, Picking strategy, and Print control.
- Configured and tested all Internal Warehouse Processes such as Bin-to-Bin transfer, Physical Inventory, and Warehouse Managed storage location to IM Managed storage location and vice-versa.
- Provided production support for Procure to Pay, Inventory Management, and Warehouse Management.
- Worked on Decentralized warehouse systems using ALE/IDOCs.
- Provided development support for Forms and Reports and prepared the Integrated and System functional test scripts.
- Tested the functionality in development and quality systems using prepared Training documents and provided the training to the business users.

April 2014 – August 2014
Ardagh Group, PA
Lead SAP MM/WM Consultant

- Involved in AS-IS and TO-BE business process mapping.
- Set up Enterprise Structure for Purchasing, Inventory, and warehouse elements.
- Configured new warehouses, storage types, storage sections, Storage Bins, Document Number range, Storage Type activity, put away strategy, Picking strategy, and Print control.
- Configured and tested all Internal Warehouse Processes such as Bin-to-Bin transfer, Physical Inventory, and Warehouse Managed storage location to IM Managed storage location and vice-versa.
- Configured the Material Master, Vendor Master, Direct and Indirect Purchasing, Purchase Requisition, Release procedures, STOs, Output Determination, Messages, and Reports.
- Configured the Release strategies for purchase requisitions and purchase orders.
- Inventory Management: Managed material stock by quantity/value, goods issue, and stock transfer posting activities by users.
- Involved in test planning, writing test cases/scripts, test case automation, and test execution in HPQC.
- Integrated with other systems and modules, coordinated integration & user acceptance testing, and extended Post Go-live support. Imparted training support to end-users on system functionality.

June 2012 – March 2014
Hospira Inc., IL
Data Migration Lead (MM/WM/IM)

- Involved in business meetings, understanding the AS-IS process, and preparing the high-level Design Documents Mapping Templates and Solution Summaries for their Global roll-outs for Liscate Italy, Australia, and India Plants.
- Mapped business requirements through Quick Gap Analysis. Understood business processes, studying & analyzing to design solutions.
- Prepared Detailed Process Flow for functional requirements. Created & validated master documents.
- Worked on the configuration of Inventory Management, including Plant parameters for Inventory Management, Good Receipts, and Invoice receipts.
- Configured Storage types, Storage Sections, Storage Bins, Document Number range, Storage Type activity, Put-away strategy, Picking strategy, and Print control.
- Configured and tested all Internal Warehouse Processes such as Bin-to-Bin transfer, Physical Inventory, and Warehouse Managed storage location to IM Managed storage location and vice-versa.
- Batch SLED Project: Analyzed existing custom Batch SLED (Shelf-Life Expiry Date) functionality and designed the solution to handle manufacturing process functionality in a standard way.
- Functional Test Scripts as per the GxP and SoX standards using the HPQC.
- Identified the existing interfaces, user exits, reports, function modules, and leverage to user standard IDOC interface to be modified as per the new design.
- Responsible for business continuity adhering to the SQA process, and process compliance.
- Enhancements:
  - ECC to JDE (Canada interface) to send SAP Delivery.
  - JDE to ECC update FedEx labels in ECC delivery.
  - Qcore ->SAP then SAP ->QCORE - Create equipment for Qcore pumps and create Inbound Delivery and assign Serial Number to Delivery and assign to transfer order and HU. Send confirmation with a Delivery number to Qcore system.
- Created ASN in SAP and sent to AII / OER (Auto ID system) -- IDOCS.

- DATA3 to SAP and SAP to DATA3 (IDOC) -- 3PL system.
- Whenever the equipment/batch was created in data3, it sends WMMBGR IDoc to SAP and creates Batch extension and Good Movement by assigning inventory and reducing Stock. The Same Goods movement number (Document Number) and inventory information send back to Data 3 system for tracking.

June 2010 – May 2012
Pearson Technologies, NJ
Senior SAP Consultant MM/WM/IM
- Provided Production Support for four different landscapes clients in Pearson and Penguin for the countries of the USA and Canada.
- Carried out root cause analysis for the repeated problems and suggested/implemented preventive measures.
- Responsible for all ticket monitoring, prioritizing the tickets based on business priority, and assigning the tickets to team members.
- Conducted business meetings/weekly meetings and handled escalations.
- Processing of transfer postings and special stocks in Inventory Management like sub-contracting, third-party, and vendor consignment.
- Worked on the configuration of Inventory Management, including Plant parameters for Inventory Management, Good Receipts, and Invoice receipts.
- Configured and tested Inbound, outbound, and transfer posting processes.
- Converted mass amounts of data into SAP, ensuring the quality of the data and extraction using WinShuttle in SAP and data load with LSMW.
- Worked on Decentralized warehouse systems using ALE/IDOCs.
- Monitored the PR and PO interface issues, new vendor plant creation and Deletion, Creation, and Assigning Group BOM to Plant.
- Functional support for enhancements related to additional MM functionalities and reports.
- Followed the various business process of the clients, preparing specs and updating the daily activities in the tracking tool.

July 2009 – May 2010
ETC, Middleton, WI
SAP Consultant MM/IM

March 2007 – January 2009
Maytas Infra Limited, India
Team Lead SAP MM/IM
