

# Sustainability Week Kit

*You can only solve what you understand!*

This section is dedicated to several useful tools to train yourselves & your colleagues or teams on sustainability topics.

**Videos** to watch. They are short and go straight to the point, making them ideal to watch during a lunch break, a zoom relax-time all together or during free times whenever you want.

**Articles** to better grasp the problem.

**Workshops & Activities** to engage your colleagues.

**Quick-win Actions** to implement in your company. Quick wins may not have a huge overall impact but are easy steps to implement to show results and win colleagues' support for further impactful steps.

---

## Topic 1: Climate Crisis & Singapore

Understand the why & how of Climate change, the impact on Singapore, what actions are taken and the importance to act NOW as an individual and as part of a company.
