

SharePoint Consulting Services

South 6 recruits experienced SharePoint consultants to ensure clients realize their investment in information technology. Our experience spans a wide range of industries: computer and IT services, financial services, health services, higher education, life sciences, manufacturing, pharmaceuticals, public sector, retail, telecommunications, utilities, and more.

Our SharePoint consulting expertise includes:

- SharePoint Developers
- SharePoint Administrators
- SharePoint Architects
- SharePoint Integration Specialists

Our consultants utilize industry best practices to deploy and integrate SharePoint into our clients' business processes and guide our clients in optimizing and maximizing the core components of SharePoint features and functionality. These consulting services include:

Assessment, Planning and Governance

- Analyze functional business needs
- Assessment of current technology
- Business need and SharePoint road-mapping

Collaboration and Enterprise Content Management

- Improved management of structured and unstructured data
- Establish retention, records management, and archiving policies
- Enhanced compliance management through reduction of unmanaged content

Customization and Integration

- Enhanced accessibility, navigation, and user experience
- Integration with legacy applications and systems
- Modification of back end infrastructure

Implementation and Deployment

- Define implementation objectives
- Outline configuration options, data migrations, and workflows
- Establish security requirements, reporting requirements, dashboards

Social Media and Website Development

- Integration with external social media
- Front-end design and presentation
- Extension to mobile devices
