Big Data Software Consulting Services

South 6 recruits experienced functional and technical consultants for all areas of the Enterprise Data Solutions, to ensure clients optimize their Big Data software investment. South 6 bridges the gap between Big Data software vendors and clients, assuring seamless integration between products and existing infrastructure. Our Big Data software experience spans a wide range of industries: computer and IT services, financial services, health services, higher education, life sciences, manufacturing, pharmaceuticals, public sector, retail, telecommunications, utilities, and more.

South 6's consultants utilize industry best practices to integrate Big Data software into our clients' business processes, and guide our clients through all phases of the project by delivering the following services:

- Project Management
- Functional Consulting
- Technical Consulting
- Implementation and Configuration
- Interface Design and Development
- Data Conversion

- Project Auditing
- System Integration
- Reporting, Analytics, and Business Intelligence
- Training
- Inter-Enterprise Solutions
- Collaboration
- Marketplace

- Fit/Gap Analysis
- Hardware Sizing & Procurement
- Workflow
- Documentation
- Migrations and Upgrades

South 6's senior software consultants specialize in all areas of the enterprise data solutions including but not limited to:

- Big Data Platform and Optimization
- Data Science
- Data Analytics
- Data Cleansing and Aggregation
- Data Modeling
- Data Engineering
- Data Migration
- Data Maintenance
