ONE MARKETPLACE

Through the IDEAOLGY platform, developers will be able to collaborate between different projects as well as trade templates and educate each other. Creating one big community, they will help each other and act as a self-sufficient ecosystem. Community members will also have an option to support kickstart projects, hire freelancers, buy creative assets, lock coins, earn dividends, and much more.

The CHALLENGE

Over 40% of new businesses fail because their product doesn't fill a gap or offer a solution to the marketplace. Around 30% run out of cash. They spend their whole budget on unimportant, short-term issues and lose sight of the big picture. Lastly, 30% of startups fail due to problems with their workforce.

As a developer, though, your focus is – or should be – mainly geared towards coding. Understandably, you spend most of your time developing your project and transmitting your vision to your peers. Networking, marketing and finances are probably the least of your concerns. Motivating and tracking the performance of your troops in these areas might also not be something you're necessarily comfortable with – even if you're conscious of their importance.

**Don't worry,
we have you covered.**

The SOLUTION

IDEAOLGY's unique sharing-orientated platform, developers are able to collaborate on different projects and free trade ideas, skills and procedures.

IDEAOLGY combines the three elements necessary to take a business to the next level: Blockchain technology, a Blockchain Launchpad and, last but not least, IDEAOLGY project founding.

Because we believe in fairness, IDEAOLGY doesn't force developers to tokenize their ideas but, instead, tokenizes their equity shares. With project founding available worldwide, we enable those with the potential to grow, even in lesser developed areas. Through IDEAOLGY's unique sharing-orientated platform, developers are able to collaborate on different projects and free trade ideas, skills and procedures.

ICO

We'll use your initial funding to grow a thriving community, then give it back to you, the people.

Through the ICO process, we'll build our communal environment as it develops. Just like a family, we'll love it, raise it, and watch it grow together. By using the IDEAOLGY platform, you'll be invited to help us create a perfect eco-system that will ultimately serve you, taking your feedback and advice into account, and improving it as we grow.

**We hope you'll believe in us.
We sure do believe in you.**

IDEA

IS A CATALYST

IDEA Token is utility token and enable you to gain a financial freedom, lessen risks and switch your idea into business.

- ERC20
- integrated wallet
- buy/sell/get funded
- and HODL :)

CMO & COO

Matija Minović
Brand & Design Specialist

Md. Zil
Community Happiness Specialist

Many great ideas never come to life due to a lack of funds, knowledge or people. We had to put an end to that! We are a team of talented developers from around the world, connected by the same passion and ideas.

Through years of remote, outsourced and freelance work, we realized the necessity for a united platform that allows people with talent to join forces through a structured eco-system.

We thus created **IDEAOLGY**, a unique Blockchain Launchpad enabling business founders, freelancers and developers to collaborate, grow and achieve their full potential.

Whether you are a developer or a freelancer, **IDEAOLGY** will give you all the opportunities to find an exciting project where you can shine and further your career.

Combining all the services business founders need to develop their business, **IDEAOLGY** creates the perfect conditions for your success.

By bringing everyone under the same roof, **IDEAOLGY** is committed to remove boundaries and promote business collaboration worldwide.

Because our main ambition is to allow talent to thrive, no matter where it is.

Even with a great idea, most people simply never get the opportunity to build a successful business. We all need a little help when we get started. And with the right kind of network, the right kind of guidance, I believe everyone can achieve great things.
