Experience

Social Native

Senior Full-Stack Engineer

Beverly Hill, Ca
Aug. 2019 to Apr. 2020

- Developed and maintained marketplace platform allowing end-users to review and submit photo & video content and search for content creators based on search criteria using React, Typescript and GraphQL
- Implemented and designed several data grid layouts using open-source projects to seamlessly display 1.2 million creator's profile data in order to improve the end-user workflow and efficiency
- Created an internal Npm MobX package to manage the state of the complex layouts for the various data grids.
- Designed wireframes, screens and built user interface mockups using Figma for the CRM platform

ButterFLi

Lead Full-Stack Engineer

Los Angeles, Ca
Mar. 2018 to Aug. 2019

- Led efforts to re-architected a large-scale PHP, Laravel, and MySQL web application to React, Redux, Node.js, and MongoDB.
- Developed and released a cross-platform mobile app for both Android and iOS using React Native, Redux, Node.js, MongoDB, and Socket IO
- Integrated Google Maps Geolocation and Distance Matrix API in order to track passenger and driver location.
- Created and maintained a REST API infrastructure that incorporated Socket IO for real-time communication and Redis for caching.

BCG Digital Ventures

Senior Full Stack Engineer

Manhattan Beach, Ca
Feb. 2019 to Sept. 2019

- Developed a front-end web app for Suppliers Inventory Tracking System using React, TypeScript, Node.js, and CouchDB.
- Built a cross-platform mobile app for tracking RFID tagged inventory using React Native, TypeScript and CouchDB for Android.
- Created unit tests and test cases in Jest and Enzyme that increased code coverage by 70%.
- Participated in front-end architectural discussions on design principles and best practices for the overall product.

Next Level Buzz

Full Stack Engineer

Los Angeles, CA
Apr. 2018 to Apr. 2019

- Created the front-end for an analytics platform using Angular 5/6, Node.js and MySQL that allowed customers to visualize and monitor data.
- Developed a Slack Bot to message customers when critical errors occurred using Slack API and Node.js
- Implements and maintained various API integrations from Zoom, BlueJeans, Polycom, Cisco, and other cloud services.

Unstoppable IO

Frontend-Engineer

Houston, Tx
Mar. 2016 to Apr. 2018

- Created multiple mobile responsive web applications, participating in the whole process of their development: product design and estimation, code design and development, DevOps, UI/UX design, product launch and maintenance
- Developed the front-end and back-end for an entertainment & event startup using React, Node.js and MongoDB incorporating a REST API and Passport.js for authentication.
- Designed and coded new features and enhancements according to clients' request

Product Manager

Houston, Tx
July 2016 to July 2017

- Led marketing strategy that increased e-commerce website product sales by 45% and generated \$60k in revenue within 6 months.
- Collaborated with business, development and UX to create and prioritize user stories, incorporating clear requirements and acceptance criteria.
- Acted as a point of contact for clients in order to keep their design and development visions fulfilled and their priorities met.
- Led the business requirements gathering and wrote PRDs in conjunction with the clients for initial MVP.
- Defined product KPIs, using them to measure/report progress and to align product development to business strategies.

Education

University of Houston

B.S. in Electrical Engineering 2007

Product School

Certification in Product Management 2017
