

## **Software Engineer - Operating Platform**

### **Software Engineer**

#### **Who We Are**

Addepar's mission is to bring data, technology and people together to help investors make more informed and timely investment decisions. Our wealth management platform is transforming the fintech industry by providing data aggregation, analytics and reporting for even the most complex investment portfolios. Here, your voice matters. We believe that portfolio, market and client insights can make a significant and sustainable impact, one person and one community at a time. Working at the intersection of groundbreaking technology and limitless financial services industry growth, we are optimizing how capital is put to work.

#### **The Role**

We are currently seeking a backend software engineer to join our operating platform group! In this role, you will have the opportunity to use the latest technology stacks to build the next generation of the *entire data, computation, API, and research platform* of Addepar. We want people who are passionate and care deeply about the success of the whole company. We look for self-driven engineers with real technical depth and a desire to solve complex problems related to financial data in a modern way. If you've designed complex scalable systems, or worked with great teams on hard problems in financial data, or are just interested in tackling really hard technical, mission-critical problems, come join us!

#### **What You'll Do**

- Implement and maintain engineering solutions by writing well-designed, testable code.
- Manage individual project priorities, deadlines, and deliverables.
- Collaborate effectively with product managers, engineers and stakeholders on projects.
- Document software functionality, system design, and project plans; this includes clean, readable code with comments.
- Learn and promote engineering best practices and principles.

#### **Who You Are**

- B.S., M.S., or Ph.D. in Computer Science or similar technical field of study (or equivalent practical experience.).
- Minimum 1 year of experience as a professional software engineer and experience with any object-oriented programming language.
- Ability to write software to process, aggregate, and compute on top of large amounts of data in an efficient way.
- Strong communication and collaboration skills.
- A strong ownership mentality and drive to solve the most important problems.

- Passion for implementing best practices with a bias toward smart automation.

### **About Addepar**

Addepar was founded in 2009 by Palantir co-founder Joe Lonsdale, who currently serves as an active Chairman of its Board of Directors and General Partner at 8VC. Addepar works with hundreds of leading financial advisors, family offices and large financial institutions that manage data for over \$2.5 trillion of assets on the company's platform. Addepar was named a Forbes Fintech 50 company and honored as a member of the CB Insights Fintech 250. Addepar is headquartered in Silicon Valley and has offices in New York City, Salt Lake City and Edinburgh, Scotland.

At Addepar, we are driven by our core values:

- **Take Action** - We believe in empowering each other to make decisions that elevate our colleagues and our communities.
- **Build Together** - We celebrate success by recognizing the value of collaborating with each other, our clients and partners.
- **Best Ideas Win** - We welcome new ideas that inspire change.
- **Demand Transparency** - We encourage open discussion and information-sharing to strengthen communication across organizations.
- **Solve Problems that Matter** - We put our community of clients and partners first by creating technology that meets their needs today

In addition to our core values, Addepar is proud to be an equal opportunity employer. We seek to bring together diverse ideas, experiences, skill sets, perspectives, backgrounds and identities to drive innovative solutions. We commit to promoting a welcoming environment where inclusion and belonging are held as a shared responsibility.

To ensure the health and safety of all Addepeeps and our prospective candidates, we have instituted a virtual interview and onboarding experience.
