WORK EXPERIENCE

Stellar Live, Inc.

Lead Mobile/TV Developer

January 2022 - Present

- Built consumer- and business-focused iOS (Swift/SwiftUI) and Android (Kotlin/Compose) applications that were key strategic differentiators in the vertical market
- Implemented video players across multiple platforms that supported live video, authentication, and Dolby Vision/Atmos
- Self-taught Brightscript to help bring our services to the Roku platform
- Integrated Stripe-branded Bluetooth POS hardware and implemented a camera-based barcode scanner for paper ticketing
- Main collaborator with backend team on the design and implementation of GraphQL APIs

Goldstar Events, Inc.

Lead Mobile Developer

September 2017 - January 2022

- Lead engineer on the largest direct channel for the company (more than 25% of revenue) and achieved a 4.8/5.0 Apple App Store rating on over 30,000 ratings
- Led a small team to update code quality standards and complete transition to Swift
- Introduced CI-based quality tools and automatic app distribution
- Established high-quality coding standards using linting tools and encouraging the use of modern style guides for each app's respective languages
- Created TDD standards in all apps for new features
- Increased the crash-less percentage rate to at least 99.5% consistently in all apps
- Regularly convened with team in teaching modern platform practices to better improve their skills and help keep app quality high
- Delivered new features on a weekly schedule that immediately affected over 375,000 monthly active users
- Created a cross-compiled API library in Kotlin for both Android and iOS

Goldstar Events, Inc.

Senior Android Developer

March 2015 - September 2017

- Completely rewrote Android app in Kotlin and single-handedly maintained feature parity with both web and Apple applications
- Provided ways for better user engagement and increase year-over-year revenue on a quarterly basis
- Optimized app performance while keeping a clean codebase by abiding by Java/Kotlin-style guidelines
