

SAFELY RETURN TO WORK

As the world begins to reopen in phases and adjust to the “new normal” of working during the COVID-19 pandemic, leaders want to take the right steps to ensure the health of their co-workers, families, and communities.

It is possible to safely return to work in compliance with CDC recommendations, OSHA requirements, and expert medical guidance developed to help reduce the spread of COVID-19.

What is Workplace Health?

Because Health, a Seattle-based telemedicine platform, has developed a comprehensive Workplace Health™ program that provides employers with a simple, safe, and secure solution to ensure healthy work environments.

The purpose of this [Workplace Health Guide](#) is to ensure that your business stays compliant with stringent OSHA requirements and CDC recommendations as you and your employees return to normal operations.

WORKPLACE TESTING PROGRAM

- ✓ Dashboards for monitoring risk
- ✓ Track workforce availability
- ✓ Regulatory compliance
- ✓ Employee wellness
- ✓ COVID-19 & antibodies testing
- ✓ Self collection test kits
- ✓ Contact tracing
- ✓ Daily symptom screening

RETURN TO WORK DURING COVID-19

On-site Testing & Temperature Checks

We staff medical professionals onsite to conveniently and rapidly test your workforce as they return to work. Our flexible, turnkey program integrates with your company's COVID-19 response strategy and is built to act on positive test results.

Risk Assessments & Recommendations

Risk assessments are meant to protect your employees, inform testing strategy, and prevent reintegration of asymptomatic and/or at-risk workers into the workplace. We help ensure that high-risk employees are identified and properly considered.

Wellness Checks & Employer Dashboard

Wellness checks are meant to maintain a healthy work environment by verifying the health of employees before they enter the workplace. We alert you to positive screenings, and escalate cases to a medical professional for a telehealth assessment.

Telehealth Assessment & Guidance

Telemedicine increases the overall effectiveness of your COVID-19 response strategies by immediately connecting at-risk employees with medical professionals. If necessary, employees are remotely monitored and guided toward additional medical care to ensure recovery.

Your Personal Medical Consultant

Your personal medical consultant is a physician who will help you manage your COVID-19 response strategy each step of the way, including your return-to-work programs, policy compliance, workplace exposure risk assessment and mitigation, and much more.

CONTINUE TO STOP THE SPREAD

Covid-19 is spread via respiratory droplets, whether someone is symptomatic or asymptomatic. It is medically advised to combine hand hygiene with other infection prevention and control measures, such as social distancing and wearing a mask, to prevent transmission via droplets.

Maintain distance

Wear a mask

Wash hands

"I highly recommend Because Health to test your employees for COVID-19 and antibodies. The services were very professional and convenient with on-site testing. The medical professionals were excellent and put our nervous teams at ease."
