

FOR IMMEDIATE RELEASE

CPS Armor Chemicals bring premium quality without the premium price tag!

Norris, TN – June 17, 2021– The CPS Armor Concrete Chemical line includes densifiers, guards, and sealers specifically formulated to enhance the concrete polishing process. The CPS Armor Concrete Chemical line was developed with versatility in mind, from ease of use to competitive coverage rates, CPS Armor Concrete Chemicals go a long way.

CPS Armor Concrete Chemicals are specifically formulated to strengthen and protect concrete! From multiple densifiers, topical guards to a fully penetrating sealer, CPS Armor Concrete Chemicals have everything you need to make your concrete floors looking their best!

“CPS is primarily thought of as the leader in propane floor grinding equipment, however CPS manufactures a complete range of diamond tooling and concrete chemicals. I am very excited that we are focusing more on ancillary products that support contractors within our industry and strive to be a one stop shop for concrete preparation, grinding, and polishing equipment, tooling and chemicals”, says Dustin Thomas, Marketing and Inside Sales Manager.

About Concrete Polishing Solutions (CPS)

CPS is the market leader in the manufacturing of propane concrete floor grinding and polishing equipment. CPS also manufactures a full range of proprietary diamond tooling for coatings removal, floor preparation, floor polishing and concrete floor maintenance. Recent developments include the CPS Rover VacPac, which is a fully self-contained, remote control, ride-on propane floor grinder with integrated, OSHA compliant dust extractor.
