

FOR IMMEDIATE RELEASE

CPS Hires Corey Payne to Develop Service and Rental Department

Norris, TN – March 1, 2021– CPS is pleased to announce the hiring of Corey Payne as the CPS Service and Rental Manager. He will be managing the new business unit covering service, rental and technical training support. Payne is joining CPS during a growth period where CPS is expanding their sales force, tripling in size.

Over the years, Payne has substantiated his knowledge and expertise through his experience in the diagnosis and repair of various electrical, mechanical, and pneumatic systems commonly found on equipment within this industry. His experience also includes starting a Knoxville based service and distribution facility, within the concrete polishing industry, from the ground up and grew the business and brand substantially in his territory by integrity, excellent customer service, and quality workmanship.

Payne will be responsible for growing the CPS Service and Rental department through supporting contractors by servicing equipment repairs including, but not limited to, all brand types of floor grinding and polishing equipment, shot blasters, generators and much more. He also has an extensive knowledge of diamond tooling and polishing techniques. “We are extremely excited to have Corey Payne on board at CPS. His ability to fix any and everything helps CPS be able to service ALL contractors whether they have CPS equipment or not!”, says Dustin Thomas, Marketing and Inside Sales Manager.

About Concrete Polishing Solutions (CPS)

CPS is the market leader in the manufacturing of propane concrete floor grinding and polishing equipment. CPS also manufactures a full range of proprietary diamond tooling for coatings removal, floor preparation, floor polishing and concrete floor maintenance. Recent developments include the CPS Rover VacPac, which is a fully self-contained, remote control, ride-on propane floor grinder with integrated, OSHA compliant dust extractor.
