

FOR IMMEDIATE RELEASE

The industry's tried-and-true concrete floor grinders!

Norris, TN – August 23, 2021– The CPS grinders are equipped to handle various types of jobs, including surface preparation, coatings removal as well as grinding and polishing concrete flooring. CPS has a complete range of true-planetary floor grinders equipped with three grinding heads upon which plates and tooling for different applications can be attached.

The CPS 320 series floor grinders are the industry's fastest selling in their class. They are perfectly balanced for a consistent scratch pattern as well as extremely easy to tilt back for tooling changes. It connects to the CPS CAT 5 Series or CAT 4 Series Dust Extractors for OSHA compliant dust control. The CPS 320 XHD and/or 320 D floor grinders are must-haves for any serious concrete preparation, grinding and polishing contractor.

“CPS has been a pioneer in the concrete polishing industry, especially with propane equipment. The G 320 D propane, planetary floor grinder was a game changer! Years later, it remains one of the best floor grinders in the industry – its quality is unbeatable. I have personally polished millions of square feet and logged thousands of hours on the G 320 D Propane, and for me, nothing else comes close.”, says Rodney Overton, Sales and Technical Support.
