

Cyber Threat Intelligence as a Service

Cyber threat intelligence is information about threats and threat actors that helps mitigate harmful events in cyberspace. Cyber threat intelligence sources include open source intelligence, social media intelligence, human intelligence, technical intelligence or intelligence from the deep and dark web.

Like all intelligence, cyber threat intelligence provides a value-add to cyber threat information, which reduces uncertainty for the consumer, while aiding the consumer in identifying threats and opportunities.

In cyber threat intelligence, analysis often hinges on the triad of actors, intent, and capability, with consideration given to their tactics, techniques, and procedures (TTPs), motivations, and access to the intended targets. By studying this triad, it is often possible to make informed, forward-leaning strategic, operational, and tactical assessments.

Lack of Resources?

Cybrella as a Managed Security Service Provider.

Cybrella Alerts Fatigue?

Dedicated Analyst will prevent false-positive and will refine the relevant information for you.

Technical Difficulties?

A cybersecurity expert is ready to assist and provide technical actionable items, tailored for your needs.

Plenty of Assets?

We provide a "Cyber Intelligence Umbrella" to cover all your domains, IPs, Technologies, etc.

Intelligence Areas

Tactical

Focused on performing malware analysis and enrichment, as well as ingesting atomic, static, and behavioral threat indicators into defensive cybersecurity systems.

Stakeholders

- SOC Analyst
- Firewall
- Honeypots
- SIEM
- Endpoints
- IDS/IPS

Operational

Focused on understanding adversarial capabilities, infrastructure, and TTPs, and then leveraging that understanding to conduct more targeted and prioritized cybersecurity operations.

Stakeholders

- SOC Manager
- SOC Analyst
- Incident Response
- Threat Hunter
- Vulnerability
- Management Insider Threat

Strategic

Focused on understanding high level trends and adversarial motives, and then leveraging that understanding to engage in strategic security and business decision-making.

Stakeholders

- CISO
- COO
- Executive Board
- CIO
- CTO
- Strategic Intel

Cybrella CTI (of the Cybrella Security Group) provides Cyber Threat Intelligence services, which allows you to proactively defend against existing and future Cyber events, as well as getting a broad Intelligence picture regarding Cyber attackers targeting your organization, your organization as its been viewed from the outside, compare with your business sector, geographical cyber threats, and more.

Cybrella CTI team is on the hunt, with 24/7 capabilities of collecting, analyzing and reporting any type of digital information. Combining cutting-edge technology (as well as OSINT and HUMINT capabilities) and top-level expertise, our team of Cyber Experts and Intelligence Analysts gather information from multiple resources (Darknet and Deep web included), in order to deliver a comprehensive, up to date and relevant and view of the cyber threats landscape. This information is essential for planning and updating the organizations control for defense.

Cybrella CTI Deliverables

 Monthly Intelligence Reports	 Weekly Intelligence Reports	 Daily Intelligence Alerts	 TVA Services (Threat Vulnerabilities Analysis)	 Targeted Intelligence Articles	 VIP Data Protection	 Cyber Threat Expert on Demand
