MADDY TARA REI STEVENS

BA (H) ANIMATION

Hello! My name is Maddy - I am a 2D animator and visual development artist. For my thesis project, I decided to make a film tackling current sociological adversities from the perspective of 6 young adults. Through the use of interview, a familiar setting, and a blue and purple saturated colour scheme, my aim was to immerse the viewer in the thoughts and emotions of each protagonist, in an effort to make the audience reflect on the current dialogue we are having in the UK. Now that I have finished university, I will be relocating to Manchester in aid of advancing my creative career - and hopefully furthering my exploration into more sociologically stimulating topics!
