# iCOLLECT

## The essential used cooking oil service for cloud kitchens

Cloud kitchens are a welcome new addition to the UAE food scene. As an entrepreneur-led business ourselves, we are always keen to support initiatives that enable new companies to start up, or existing companies to diversify and scale up.

Into the brave new world of the cloud kitchen comes our iCollect service: we collect and recycle your used vegetable cooking oil in a system that is quicker, easier and cleaner than you could ever imagine. This is no exaggeration. We started our oil collection service a decade ago for McDonald's, our longest-standing client, and since then we have fine-tuned it and added hundreds more clients.

You have the satisfaction of knowing that your used oil is being put to the best possible use as it becomes the raw material for Net Zero Biofuel™, the clean, green replacement for the fossil fuels that cause climate change. And we all benefit from the in-country value of a local system.

### Easier and cleaner

We start the iCollect process by providing each kitchen with one of our award-winning iROCs (Intelligent Reusable Oil Containers). This portable marvel is durable and lightweight and is simply wheeled in and out of premises as shown here. It holds 120 litres, can withstand high temperatures and is easy to keep clean. No more greasy, cumbersome and hazardous oil drums.

## Quicker and cleverer

With inbuilt sensors, iROCs communicate directly with the Neutral Fuels cloud portal so we always know the location of each one and we are able to monitor oil levels and temperatures in real time. When our automatic system alerts us that an iROC is full, our staff will arrange to take it away and replace it with an empty one. Waste oil disposal and recycling has never been simpler for you.

## No need for permits or paperwork

We know the rules and regulations of waste oil transportation and disposal. We've got compliance fully covered so you never need to worry about paperwork and permission because we take care of all that. Our professional waste oil recycling operation is well known to the authorities so you can confidently leave this task to us.

We provide you with a green certificate authenticating the safe recycling of your waste oil into clean, green biofuel, and we update government waste management systems.

## Contact

Gavin Adendorff is standing by to answer your questions and give you more detail about iCollect. Email him on [uco@neutralfuels.com](mailto:uco@neutralfuels.com) or call +971 50 954 3119.
