

Versant + Remote Monitoring

Secure offsite exams to streamline your recruiting process

The world is changing—shouldn't the way you recruit candidates change too? Recruiters and other HR professionals have trusted Versant tests for over 25 years to standardize their recruiting processes and make effective hiring decisions. Versant + Remote Monitoring combines the reliability of the Versant English tests with the flexibility of a secure offsite testing experience, enabling corporations to expand their talent pool and advance only the most qualified candidates.

Remote monitoring secured by AI, trusted by experts

Versant + Remote Monitoring allows your candidates to take the Versant English exams at a convenient off-site location, with additional layers of security and verification. Pearson has partnered with HirePro, a leading HR assessment solution provider with over 15 years of proctoring experience, to automatically monitor Versant testing using their specialized AI algorithms. While there is no human examiner present during the exam, test sessions are monitored and recorded through HirePro's online proctoring service, and suspicious test taker behaviors are flagged for administrators to review.

How does it work?

AI algorithms detect any suspicious activities during testing, empowering administrators to review whether a test result seems authentic.

What is it looking for?

Image monitoring: a different face or multiple faces appearing in the video frame, or camera blocked

Browser monitoring: navigating away from the test window. Changing tabs multiple times will be counted as violations

Video monitoring: test taker moving out of camera view, more than one person in camera view, or looking away from the camera multiple times

Complete recording: access anytime for audits and reviews. Suspicious segments highlighted for easy review

Secure.

Test taker data is securely stored and meets all GDPR standards

Flexible.

Allows the security of an in-person test, with the convenience of on-demand testing anytime and anywhere in the world

Fast.

Remote monitoring identifies suspicious behavior and incident reporting available for admin within minutes of test completion

Cost effective.

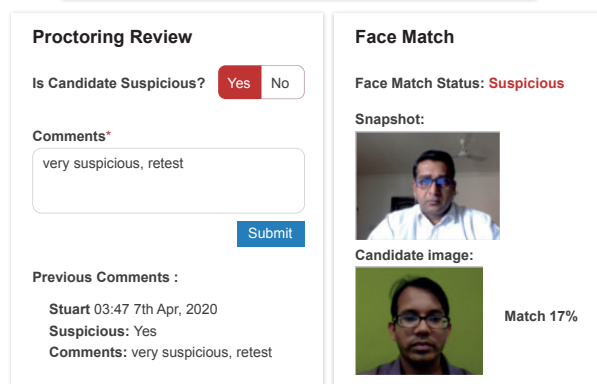

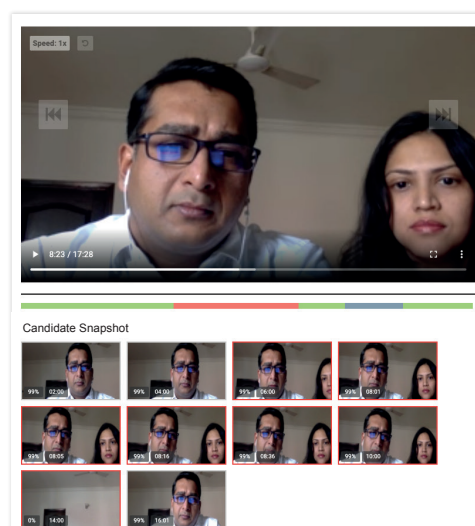

Remote testing improves recruiting efficiency so only the most qualified candidates advance to in-person interviews

Remote Monitoring at a glance

- Compatible with Versant 4 Skills Essential Test, Versant English Test and Versant Writing Test
- Web-delivered testing only
- Computer and headset with built-in microphone required
- Stable internet connection required

Easy test administration process

1. Administrator gains access and adds test takers to the HirePro test admin platform
2. Invitations are sent via email to test takers inviting them to take their Versant test
3. Test takers are prompted to upload a photograph and provide their consent to be monitored
4. Test takers follow the on-screen instructions to take their test
5. As tests are completed, admins can download scores and review session recordings for any fraudulent behavior
