

**AqualiteUS COVID-19 Update:** *Find out how Aqualite US is working to keep You, our People and our Families healthy, safe and secure.*

We hope you and your families are well. Aqualite US continues to provide essential water purification services for all of our residential and commercial customers in the US throughout the Northeast and Southeast. Now more than ever, clean water and air are vital for good health.

**To ensure we can continue to provide the best and safest services for you & your families—as well as keep our employees safe Aqualite is taking extra precautions and safety steps.**

**As a special additional benefit for your family we are going above and beyond for our customers** by coming to your home or business with our new **Air Purification and Sterilization System** designed with technology engineered to eliminate contaminants in the air and on surfaces. This powerful air purification system employs unique NASA technology and is currently used in homes, offices, hospitals, daycare, hotels and professional sports facilities worldwide. It is the only Certified Space Technology that works to continuously clean and protect air and surfaces 24 hours a day. This air cleaning technology is proven to destroy airborne and surface viruses, mold, fungus, volatile organic compounds and bacteria. Our new system will be purifying and sanitizing the air in your home or business as we work and will remove 99.97% of airborne viruses as small as 0.1 micron making your home safe for you and your family.

Our premier air purification systems have been providing clean and safe air in our Aqualite US office. In addition, our offices, service vehicles and equipment are cleaned and sanitized daily as part of our normal daily business operations, to ensure that you and your families are safe. In addition, we have implemented the following safety measures and operational steps below in order to keep our clients and employees safe:

- **New disposable face masks & latex gloves worn indoors for each job site**
- **Social distancing practiced**
- **Frequent hand washing and hand sanitizer use**
- **Each technician is assigned to their own designated work truck and logs their temperature each morning**
- **Each work truck has its own PPE bin**
- **Regular vehicle and tool wipe downs**
- **Virtual "walkout" appointments (when possible) for new work estimates**

We are committed to doing what is right for our customers and families during this challenging time. Please stay safe as we work together to get through this COVID-19 outbreak, and please call us: 866-444-1050 or email: [info@aqualiteus.com](mailto:info@aqualiteus.com) with any questions or concerns.

Thank you for your business - Be Well!
