SkyBitz SmartTrailer™

Improve fleet efficiency and reduce excess capital expenses of your trailers and containers by delivering total visibility of your assets and a more complete status of your cargo. Consolidate inventory, reduce theft and track revenue with SkyBitz SmartTrailer technology.

SkyBitz offers the broadest portfolio of asset tracking products in the industry to address a wide range of data requirements from our customers. Our hardware is durable for rugged environments and leverage LTE networks, providing affordable, long service life options that are low maintenance. SkyBitz offers device options that are IP67-rated and made specifically for commercial heavy-duty use with all types of equipment and cargo.

The Falcon GXT 3002, 5002 and 5002C.

Assets Supported

- Dry Van Trailers
- Flatbed & Box Trailers
- Intermodal Chassis
- Intermodal Containers
- Rail Containers
- Frac Tanks
- Powered/Non-Powered Equipment

InSight Web Application

Our highly configurable platform offers customers a simple yet intuitive experience for tracking various asset management environments for industrial markets, transportation and logistics, government, supply chain, oil and gas, and construction. Improve

business operations by easily setting up KPIs so you can manage goals more effectively. Smart sensors, integration options, and a host of intelligent new tools allow you to hone in on areas of your business that can become more profitable.

Mobile Application

SkyBitz provides installers and maintenance staff with free mobile tools that connect them to a host of information so they can quickly and efficiently install, configure, and troubleshoot SkyBitz products. Our mobile application reduces error and ensures accountability between installers and the internal customer support teams.

Integrations

From robust standard reports, visual dashboards, trends analytics, and custom XML feeds, SkyBitz can integrate into any custom or proprietary TMS system via our open API. Integrations allow your operation to connect the dots between you and customers,

providing a more accurate revenue stream through automated digital processes. Visibility between accounting, sales, dispatch, drivers, and billing becomes second nature, allowing your teams to focus on growth rather than error.

Trailer & Asset Tracking

Make your trailers and remote assets work for you. Control your inventory and improve margins with smarter asset management technology.

Easily Track & Locate Assets

Start monitoring your trailers and remote assets quickly with prebuilt dashboards and reports for optimizing capacity and utilization. Easily identify which trailers are not hitting your targets or are prone to theft and take immediate action. Schedule equipment maintenance when necessary to avoid downtime.

Reduce Idle Days

Search, locate, and redeploy trailers that have been sitting idle. Begin managing trailers more efficiently using our Yard Check feature, which enables customers to perform a virtual inventory of what is in the trailer yard. Increase the number of loads per month carried by each trailer so you can maximize margins and reduce capital expenses.

Manage Detention Billing

Track how long a trailer has been at a customer location, which trailers are still in free time, and which have entered detention. Easily automate detention billing with TMS/ERP system integrations.

Smart Sensor Integration

A system of sensors that allow you to monitor doors, cargo, tire pressure, temperature, and more. Integrate various sensor insight with data points from third party integrations for a more accurate view of your entire operation.

Custom Installation & Deployment

Our professional install teams ensure your powered or unpowered assets are setup properly and within your scheduling requirements. We provide a range of hardware solutions so you can maximize your return on investment and be up and running as quickly as possible.
