

Automate Fulfillment & Lower Shipping Costs

About Us

ShipHawk is the premier packing and shipping software for ERP connected companies. We work with high volume retail, wholesale, and e-commerce companies that have outgrown basic shipping software.

ShipHawk gives you control to customize your business rules, eliminate manual decisions in the warehouse, reduce order fulfillment waste, and substantially reduce your shipping costs, without adding headcount.

Features

Automated Shipping Decisions

Ensure every order ships in the right box, with the best carrier and optimal service without manual decision making.

Configurable Business Rules

Create and manage business rules via text editor, without IT development, to systematize tribal knowledge and eliminate costly mistakes.

Accelerate Order Processing

Leverage data and flexible pack/ship station configuration to quickly process orders, print shipping documents, and accurately accrue costs.

Single Platform for Scale

Manage parcel and LTL shipments on a single platform that scales with your growth.

Results

25%

Reduced Shipping Costs

Tipsy Elves saved 25% of their shipping costs.

20%

Increased Productivity

Grove achieved a 20% increase in per shift warehouse productivity.

3X

Increased Processing Speed

Ergomotion increased order processing speed 3X.

“With ShipHawk, we can support our current and future carrier relationships and fully realize the work our team puts into rate negotiations. The platform quietly optimizes each order behind the scenes to maintain quality and control, even when things are getting crazy.”
