

Freight Club for third-party logistics (3PL) users

Why **Freight Club**?

With the rise in online demand for big and bulky products, sellers of products like furniture, exercise equipment, and major appliances are finding that partnering with the right specialty carrier is the key to a great delivery experience.

Freight Club specializes in nationwide residential delivery with seven service levels, including White Glove and parcel delivery, and offers secondary insurance protection.

Best rates on 30+ carriers

Pre-vetted residential delivery carriers

Full customer service, and claims and insurance management.

We offset 100% of the carbon emitted during shipping

3PL programs: 2 flexible options

option 1

Freight Club works with the 3PL to provide shipping rates and services for each of their clients. These rates can be rolled into a total service package the 3PL provides to their client. Warehouse, fulfillment, and shipping are included.

option 2

The 3PL refers the retailer to Freight Club through our Partner Program. Freight Club works directly with the retailer to provide volume shipment rates and services. This can be done via API integration with the 3PL partner on the retailer's account.

Booking freight: 3 scalable options

Web Portal

Quickly run multiple comparative quotes all in one place. Book shipping, create BOL and shipping labels, tracking, and claims management

API integration

Unlock the power of our restful API. Allows you to fully integrate all data points including quoting, booking, BOL, shipping labels, and tracking through one simple integration

Bulk product

uploading

Bulk product uploading is an ideal feature for scaling businesses not quite ready for a complete IT integration. Bulk product upload allows you to easily quote or book up to 100 shipments through one upload via our web portal.

Offset every shipment

In partnership with One Tree Planted, Freight Club offsets 100% of the carbon emissions from shipping at zero cost to our members. The program, which plants carbon-absorbing trees, supports reforestation efforts in areas of California impacted by wildfires.

Proudly partnered with One Tree Planted
